Subject: Hoop Structures Ordinance Amendment Project

Dear Santa Barbara County Board of Supervisors.

As a owner of approximately 1,000 acres on Highway 135 between Los Alamos and Lompoc, I would ask the that Board of Supervisors recognize the rapid proliferation of hoop structures. These semi-permanent structures are unsightly and destroy the rural character of the land.

Entire valleys have been filled with these hoops. Please direct the staff to create a system that regulates all hoops as the semi-permanent structures they are and takes into consideration their visual and environmental (including disposal) costs.
