**SOLE SOURCE JUSTIFICATION**

EAA Tools, Inc. solely creates and manufactures the Comprehensive Special Tool Kit (P/N: COMP-60-AA) for the H-60/S-70 platform. The GEN4 Expeditionary Kit (EXP Kit) consists of QTY 02 EA Pelican 1730 black cases, each having a customized MIL-SPEC durable foam that holds, protects and inventories all the tools in a designated spot.

The custom cases are waterproof, shock-proof per Pelican specifications, and are fully deployable and transportable. All the custom special tools in the EXP Kit are either invented or innovated exclusively by EAA Tools, Inc. and no other.

The innovated special tools in the COMP Kit that are derived from the legacy, locally manufactured tools from the US Army H-60 Work Packages. However, they have been dramatically re-engineered and improved upon from their original design to EAA Tools' standards. The other needed commercial tools that are not found in a general mechanic's tool box, are also included and selected from the highest quality manufacturers that include a lifetime warranty (ex: Snap-On).

The Peculiar Tool Kit is a procurable, commercial-off-the-shelf solution replaces the discontinued PTK(HET-6002PTK-101). The EAA Tools H-60 237WP Peculiar Tool Kit (PTK-60-AA), or PTK, provides a procurable and inventoriable tool kit to replace the issued PTK, which is no longer commercially available. The PTK comprises specialized field-level items and tools compatible with the specifications found in the UH-60 series Technical Manuals (TM1-1520 237-23&P). EAA Tools has updated each PTK item with key usability and durability improvements not found in either the TM nor the previously marketed version. The PTK uses a 1750 Pelican case and custom foam.

At any point in time, if there are further questions regarding our special tools, please contact me directly. We are very grateful for the opportunity to support.

Very Respectfully,

A handwritten signature in black ink, appearing to read "Ed Elsner".
