**Summary Text:**

This Hot Mix Asphalt (HMA) Overlay Project made use of Measure A Funding for the Preventive Maintenance of over 3.6 lane miles of roadway, repairing failed pavement areas, applying Stress Absorbing Membrane Interlayer (SAMI) and placing new asphalt concrete. These 3.6 lane miles were dispersed over various roads within Supervisorial Districts One, Three and Four.

The Director of Public Works accepted this project as complete on December 3, 2014. The project was completed on budget and on time.

*After- Cuesta Street*

**Background:**

This project utilized a three phase process to resurface the roadway. This includes repairing failed areas, applying a SAMI, and placing a new asphalt concrete overlay. The SAMI is a combination of highly polymerized asphalt emulsion and crushed quality aggregate. SAMI waterproofs the sub base, helps reduce reflective cracking while extending the life of the subsequent overlay.

This is one of many pavement strategies the Department employs in its annual Preventive Maintenance Program and consists of repairing failed areas and replacement of damaged asphalt concrete pavement. This project was in place as part of the FY 2014/2015 Road Maintenance Annual Plan (RdMAP), approved by your Board on May 6, 2014.
