Subject: Letter of Protest

Mr. Allen,

It is our understanding that the County of Santa Barbara, Board of Supervisors has received a letter from Valley Slurry Seal Company, protesting or attempting to influence the County decision on how to award or specify certain pavement preservation projects. Western Emulsion respectfully requests a copy of this letter.

As you know Western Emulsions is a long time vendor to the county and has supplied and partnered with the County, on numerous successful and at times award winning County of Santa Barbara pavement preservation projects. We feel it is important that the county not let a contractor who has a less than poor track record, when it comes to successful projects, influence one of the most successful pavement preservation programs in the entire Country.

Please forward a copy of the letter at your earliest convince.

Sincerely,

Bob Koleas
President/CEO
