This is an absolute scandal.

The following video is from a nurse in Riverside testifying that dozens of Spanish speaking COVID19 patients with mild symptoms are being flown by medivac planes from the Mexican border to Riverside to create the appearance of a second spike in COVID. This is costing the state \$30-100,000 per flight. Please stop playing into the political agenda.

Sincerely,
 Dr. Hesu Whitten

Regarding COVID19 policy, it's really important we get it right and policy should reflect actual science not baseless fear. Every prediction the CDC and WHO made about the dangers of COVID turned out to be wrong. We now know the science with a high degree of certainty and policy should reflect that. The facts are 1. children have an extremely low probability of complications and there's no evidence they transmit COVID19 to adults. Not a single case. 2. There's no scientific justification for children wearing masks in school. Surgical masks are designed for sterile environments, surgeons replace them every 30 minutes, and if they touch the mask they immediately have to re-sterilize. 3. the initial predictions were two million American deaths and 3 to 4% mortality rate. The death rate ended up being orders of magnitude lower and the fatality rate is 0.26% and .03% for people under 50. 4. There is no scientific justification for an emergency order to continue or for children to wear masks in school or anywhere. Masks are ineffective, unnecessary and even dangerous. Three Chinese children died from running at school with masks on.

Unless you can provide science indicating a real and imminent threat to health or that the hospitals are beyond capacity from the so-called pandemic you are committing fraud to allow the emergency order to continue. The health officer by law must provide the science to the BOS to justify his orders.

Hi County of Santa Barbara -- Just sending a quick follow up here. Thanks!

-----Original Message-----

Hi County of Santa Barbara,

I saw on your website that you have a section for COVID-19 resources.

I'm reaching out as my team has spent hours creating a new list of 62 different national parks virtually check out. These are some of the most iconic and breathtaking places in the U.S., such as The Grand Canyon, the Great Smoky Mountains, and Zion National Park. The article has details on each one as well as information on how to do the tour. A lot of people put a lot of effort into this, and I think your readers would really enjoy it. Here is the link:

<https://upgradedpoints.com/virtual-tours-of-national-parks-in-us>

I'd love if you could link to this as it's something fun for people of all ages.

Look forward to hearing from you!

David

Dear Supervisors,

Please close bars as recommend by Governor Newsom. Bars are not essential and many in the County are not complying with distancing requirements.

Our priority should be lowering cases so children can go back to school more safely.

Thank you,
Nicole Lieu

Subject: DAY SPAS/MASSAGE LOCATIONS

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

To whom this may concern, I was driving past the massage envy locations in goleta on monday the 29th and the santa barbara location to find the same situation. there were at least 8 people (non workers) not wearing masks, not social distancing at all. I didn't see anyone taking temp checks when people were walking in. this is absolutely ridiculous!! when i called they said to "come as is and i should be ok" what does that even mean?! day spas and massage places are such close contact services where they have no idea if the client is asymptomatic. I hope this is taken into deep consideration. thank you
