**SECTION 6 – PROJECT STATEMENT**

- 6.01 Introduction:** During an oil spill, California operates within the Incident Command System (ICS), a mechanism used to bring multiple jurisdictions under one standard operating arena. The ICS is managed by the Unified Command, in most cases, is comprised of a designated official from the United States Coast Guard, the OSPR and the Responsible Party (Spiller); the three members make all decisions on how the oil spill incident operations are planned, executed, and demobilized.

Several Oil Spill Response Organizations (OSRO) are available to provide response and clean-up of oil spills throughout the State. However, in certain remote locations, the OSRO’s have difficulty or are unable to pre-stage response equipment. To address this problem, OSPR has established a grant program that will provide local government agencies with funding to purchase spill response equipment, so they can initiate a first response prior to the OSRO’s arrival.

- 6.02 Objectives:** Grant funding will enhance the availability of oil response equipment around the state and will provide local governments an opportunity to protect their economic resources. Grantee will purchase the response equipment and provide training as identified in Equipment Specifications (Attachment I).
