

# Santa Barbara Zoo Wetland Margin Enhancement Project

- Habitat to 228 bird species
- Forty-three of which nest there
- One of only two locations in Santa Barbara where Double-crested Cormorants and Black-crowned Night-Herons breed
- Western Pond turtle (a California species of special concern)
- Tidewater goby (federally endangered fish)

Phase I  
Phase II (this request)

Phase 2: 2014-2015

- 1.4 acres restored
- 1,530 native plants
- 40 + 60 invasive trees
- 300 + 400 volunteers
