Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Dear of the Board Clerk,

We expect that the US Bureau of Land Management (BLM) will finalize its plan to open an anticipated 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region. I find this shocking and completely unacceptable with untold risks for nearby areas.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Dear of the Board Clerk,

Please oppose fossil fuel production on federal lands in Santa Barbara County.

I've lived in the County 49 years and 7 months. My family wants you to protect the environment as your highest priority including halting climate change emissions countywide.

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

The oil spill impacts and threats to groundwater, surface water, and wildlife will be very significant if these dangerous projects move forward.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, habitats, watersheds, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Thank you very much.

Regards,  
Brian Trautwein

Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

Dear of the Board Clerk,

I feel very strongly about this. Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,  
Andrew Lindsey  
801 Cold Spring Rd.

Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Dear of the Board Clerk,

Before you read the following comment, I would like to say that to the extent that you are willing to protect our environment, I am willing to help you in your campaign for re-election to the BOS. Anyone who can maintain the health of our water, air and wild lands for the future will have my support.

Dear of the Board Clerk,

As someone who grew up in Santa Barbara County and appreciates the local area for its clean air, water and protected open space, I'm alarmed and deeply concerned about this proposal to open lands in the area to fracking and drilling. I have pursued a career in renewable energy because I firmly believe that is the best solution to solving our climate and energy needs. Please support a resolution to oppose the US Bureau of Land Management (BLM) in opening new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. **Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.**

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,  
Kathy Wahl

Dear of the Board Clerk,

My support of you in upcoming elections will depend how you fight to defend our local environment. I am writing to you about an important environmental concern to all of us.

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,  
Luella Engelhart
