Notice of Determination - Project Description
Lower Mission Creek Flood Control Project, Reach 4
August 22, 2023

The described action is to approve, adopt, and authorize a Resolution of Necessity for the acquisition of the fee interest in the real property for Reach 4 of the Lower Mission Creek Flood Control Project consisting of temporary and permanent easements located at 430 and 432 De La Vina Street (APN: 037-203-021); 428 De La Vina Street (APN: 037-203-020); 426 De La Vina Street (APN: 037-203-019); 414 De La Vina Street, Common Area Lot 1 (APN: 037-500-CA001); and 124 West Gutierrez Street (APN: 037-203-011).

The Lower Mission Creek Flood Control Project (Project) is a Federal U.S. Army Corps of Engineers (Corps) Project that has been under study and development since the 1960's. The Corps completed a feasibility study in 2000. The County and City of Santa Barbara are constructing the Project in sections (Reaches) as funding becomes available. As a locally funded project, the Santa Barbara County Flood Control and Water Conservation District (District) is responsible for the right-of-way acquisition associated with the Lower Mission Creek Flood Control Project, consisting of permanent and temporary easements.

This includes negotiating for acquisition of real property interests required to facilitate the construction of the improvements. Acquisition of the necessary property rights is required prior to access and commencement of construction of the flood control improvements related to the Project. The District is required to commence and complete construction of the Project within a very specific, seasonal time frame.

In order to advance the Project and subsequently operate and maintain the facilities associated with the newly constructed improvements, the District must acquire temporary construction easements and permanent easements across the five parcels.

No substantial changes are proposed in the Project as the District proposes to undertake the same actions as those analyzed in the EIR/EIS. No substantial changes have, or are anticipated to occur, with respect to the circumstances under which the Project is being undertaken. There have been no substantial changes to conditions since the EIR/EIS analysis, and no changes that would require substantial revisions to the EIS/EIR due to the involvement of new information, new significant environmental effects, or a substantial increase in the severity of previously identified significant effects. In summary, because none of the conditions in State CEQA Guidelines Section 15162 have occurred with respect to the Project, no subsequent EIR or Negative Declaration is required to approve, adopt, and authorize the Resolution of Necessity.
