Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

REGIONAL DISTRICT OFFICE

TO: Joan Hartmann

105 E Anapamu St # 406  
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Alex Xu*

Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors,

I am visiting from San Jose and love Santa Barbara's stunning coastline and beautiful beaches.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

Signed, Donna Lee Kuck

Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors,

I am visiting from \_\_\_\_\_ and love Santa Barbara's stunning coastline and beautiful beaches.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities:

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Dear Santa Barbara County Board of Supervisors,

(BC, Victoria)

I am visiting from CANADA and love Santa Barbara's stunning coastline and beautiful beaches.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities:

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

105 E Anapamu St # 406  
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Trinity I. Filuccia*

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Dear Santa Barbara County Supervisor,

Place Stamp Here

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Dear Santa Barbara County Board of Supervisors,

I am visiting from Morroville and love Santa Barbara's stunning coastline and beautiful beaches.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Paul M. Stull*

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Dear Santa Barbara County Board of Supervisors,

I am visiting from San Luis Obispo and love Santa Barbara's stunning coastline and beautiful beaches.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that puts Santa Barbara's coast and tourism economy at risk. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect Santa Barbara's local environment, wildlife and residents.

Signed,

Name: Sofia Hartman

Dear Santa Barbara County Board of Supervisors,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills -- an inevitable and routine part of offshore oil development -- can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,
