Santa Barbara Crisis Stabilization Unit

Brief Summary and Purpose of Project

300 words maximum

Behavioral Wellness serves clients with a wide-range of mental health needs from prevention activities to crisis response for children, youth and adults. To continue to provide high-caliber services, the Crisis Stabilization Unit will need to enhance the ability to supply staff with portable technology such as laptops, monitors and telehealth software licenses that support multi-modal access platforms. Upgrading equipment, increasing multi-modal access platform licenses, and providing staff and clients with telehealth centers will have a positive impact on our ability to increase avenues for engagement. Enhancement will also provide staff with flexible platforms necessary to continue high levels of coordination of care, especially with clients who are in high-risk situations or have to self-quarantine. Spanish is Santa Barbara County's threshold language and Mixteco is an underserved population and providers will be able to reach out with language interpretation services supported through telehealth platforms rather than face to face interaction.

Grant funding will allow us to convert offices and conference rooms into safe, confidential drop-in telehealth centers, increasing our client's ability to engage in services with minimal risk to the client and our staff. Examples of telehealth solutions include services in a clinical setting with social

distanced telehealth for clinical groups in reconfigured conference rooms where the clinician and clients can be present in person or virtually, or new clients at home interact with a provider working offsite via laptop for the initial screening, assessment, and ongoing treatment. Overall, the expansion and enhancement of technologies will ensure a continued level of services to clients while providing consistent points for the safety net beneficiaries to access on-site social distancing telehealth, on-site face to face services, and solely virtual telehealth services.

Project Narrative

Project Narrative Questions

Need

Please briefly describe the need to improve your facility's telehealth infrastructure; especially as it related to the impact of COVID-19. Please include a description of your facility's existing telehealth infrastructure and capacity to provide telehealth services. (500 word maximum)

The IT Department regularly assesses our technology needs and creates a multi-year strategic plan to upgrade technology on a regular basis for all employees and budgets accordingly. However, with the swift conversion to telehealth in response to COVID-19 restrictions, our technology needs changed overnight and decimated our IT budget. While we have attempted to supply all clinical staff with proper equipment, we still have staff who are not fully telehealth capable. The unanticipated and steep costs for subscriptions to Zoom and other multi-modal access platforms has severely impacted our ability to provide staff with upgraded equipment as planned for this year. Additionally, some of our highest need clients lack access to equipment necessary to engage in telehealth services. To address these challenges, we need to create telehealth centers within our offices where clients and staff can safely engage in confidential services. We will also need to upgrade and/or expand our ability to develop telehealth centers in larger spaces to conduct group therapy, hold team meetings, and continue to collaborate with our community partners to provide Coordination of Care, especially when responding to crisis situations in the field.

Our IT and Facility staff identified areas within the facility that can be converted into individual and larger telehealth centers. Transforming these areas will provide staff and clients with dedicated, safe, and confidential areas in which to engage in individual or group sessions and team meetings. Larger spaces will provide adequate spacing per COVID restrictions for in-person and virtual engagement during team meetings, group sessions and when collaborating with community partners.

The Crisis Stabilization Unit serves clients 24/7 and has to coordinate with multiple parties when clients are admitted or discharged. Not only do we have to safely transition staff during shift changes, but also when staff, who balance their time between the CSU and other Behavioral Wellness programs, are attending to our clients. The facility also needs to accommodate staff from community partners who provide case management and other supportive services, especially for clients transitioning to other levels of care. Engagement of family and/or natural support members is imperative for clients to achieve treatment goals and we need to ensure they have access to technology necessary to continue supporting their loved one. Admitting clients into our program involves a coordinated effort between many stakeholders and, due to COVID restrictions, it is often necessary to have multiple rooms available to minimize health risks of clients and staff.

We anticipate a high level of on-site engagement with the telehealth centers as they become available.

Therefore, we are also requesting funds for PPE to ensure clients and staff remain safe during in-person contacts where social distancing and indoor activity may increase exposure to the virus. Many of our clients lack resources necessary to obtain proper safety equipment, thereby increasing their risk to themselves and the community. To decrease the risks associated with close contact, we will need to supply clients, staff, community partners and other visitors with approved, disposable safety equipment while at the clinic.

Desired Outcomes

Please describe your organization's desired outcome of improving your telehealth infrastructure. (300 word maximum)

Increase our portable and facility-centered telehealth capacity for staff and clients. Our capacity to

provide consistent ongoing service has been limited since not all staff have access to modern technology whether they are at home or in a therapy or conference room. Barriers include staff having a desktop, but not a laptop therefore impeding portability, staff having laptops with small monitors obstructing the clinician’s ability to see all speakers at once while monitoring non-verbal cues, or having no staff access to technology when in the field including Wifi and other internet connectivity.

Continue to provide clients with high-caliber services utilizing multi-modal platforms allowing clients to consistently engage in services necessary to obtain positive treatment outcomes. As essential service workers, staff have transitioned to new schedules and are providing telehealth at home, onsite and in the field, which is key to keeping clients engaged in services. The platforms requested in the grant will ensure ongoing services are delivered without interruptions while also creating engagement opportunities for new clients. We continue to adjust facility hours to accommodate client needs outside of regular business hours, especially for parents who are not able to bring children or themselves to services, have limited transportation options, and other needs that may arise due the COVID-19 restrictions and response to other natural disasters.

Enhance our ability to engage linkages and supports including law enforcement, justice system, CWS and other community partners in care for our clients. Our crisis teams partner with law enforcement and the justice system to divert individuals from jail and into needed mental health services. We also work closely with community partners, including CWS, as clients transition between levels of care. It is imperative that we supply our staff with the technology needed to ensure this level of collaboration continues, regardless of COVID challenges.

Population Served

Please describe how your organization will utilize this funding to serve individuals with health disparities, including those living in rural areas. (200 word maximum)

Grant funding will allow us to enhance our ability to remain consistently engaged with current and new clients, with a focus on “safety net” individuals and those at risk of being impacted by COVID. Additional and upgraded equipment will allow staff to have the flexibility necessary to deliver high-caliber, consistent services to adults, children and families from home, in our facilities and in the field. Creating telehealth centers will increase client ability to access services especially if they have little to no access to equipment necessary to receive telehealth services. Increasing our telehealth capacity will also allow us to provide more services to clients in unserved and underserved areas, including Carpinteria, Maricopa, New Cuyama, Guadalupe and Santa Ynez. Targeted populations include LatinX, agricultural workers, Mixteco, homeless and at-risk of homeless, LGBTQIA+, TAY, elderly and veterans. We also serve individuals who have been exposed to trauma or are experiencing onset of serious psychiatric illness, children and youth who are in stressed families, are at-risk for school failure, being involved in the juvenile justice system and/or substance use disorders and other underserved cultural populations.
