Dear Supervisors

As an often challenged mother of an adult with mental health issues I urge you to stand up for our vulnerable ones. Our adult children cannot always make proper decisions for themselves due to their illness. They need your help to do so.

There is so much evidence that Laura's Law works(though it takes follow through by the County and Judges)and that it is cost effective that to not do so is a crime. Other counties have done so to great success. May we be the next.

Thank you for your compassion,  
Antoinette G Amorteguy
