Subject: STOP Sable! For today's hearing.

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Good morning,

Please deny the transfer of permis to Sable from Exxon.

I drove home from Arroyo Grande yesterday on the 101 along our pristine gorgeous coastline and saw many workers out there, which have not been seen for years, pretty disheartening!

I cannot believe we have to do this again and fight for keeping things beautiful and clean.

I have lived in Santa Barbara since 1977 and have seen the damage that oil drilling can do to our coastline.

We do not need to drill this oil because we do not get any benefit from it locally because it is sold.

Keep oil drilling out of the Santa Barbara coastline!

Thank you,
Carol Conley

Dear Santa Barbara County Supervisors,

My name is Olivia, and I am writing on behalf of the UC Berkeley chapter of Surfrider Foundation to express our strong opposition to the proposed permit transfer from ExxonMobil to Sable Offshore Corp. We urge you to deny this transfer and prevent the resumption of offshore oil drilling along our coastline.

As students deeply committed to environmental sustainability, we recognize the significant risks that continued offshore drilling poses to our marine ecosystems, local communities, and climate future. The history of oil spills off the Santa Barbara coast has already demonstrated the devastating consequences of fossil fuel extraction, and approving this transfer would extend our dependence on outdated and dangerous energy sources.

Instead of enabling Sable to revive offshore drilling, we urge the County to prioritize renewable energy development and coastal protection. Santa Barbara has the opportunity to lead in California's transition away from fossil fuels, and this decision is a critical step in that direction.

We stand in solidarity with Surfrider's "Don't Enable Sable" campaign and call on you to reject the permit transfer for the sake of our environment, our economy, and future generations.

Thank you for your time and consideration.

Best regards,

Olivia Mathai
