Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables. The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program provides an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights. This success has opened the opportunity for state grant funding to expand this program to three other California counties and we hope that Santa Barbara County can be one of them.

Thank you.

Dear Santa Barbara County Supervisors,

I hope you are all having a great start to your workweek and had a great weekend spent in a spirit of gratitude. I am writing to you all regarding a group of people for whom I am thankful: Our local farmworkers! Without them, I (and most likely, we) would not have had as much fruits and vegetables at my Thanksgiving dinner.

With that being said, I urge you to please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables. The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. The Ventura County Farmworker Resource Program has been an excellent and very successful model of what we can do to help support people who are essential to our wellbeing but whom we often do not treat as such. We owe immense gratitude to our farmworker community for their work throughout the COVID-19 pandemic and to put food on our tables every day. The success in Ventura County has opened the opportunity for state grant funding to expand this program to three other California counties and we hope that Santa Barbara County can be one of them.

Thank you.

Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center.

We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables. Yet support for farmworkers should not come just from a place of gratitude; it should come from the realization that they and their families are the economic and social base of our community. They are such a vital part of the fabric of this County, harm to them unravels us all.

The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program provides an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights. Dear Santa Barbara County Supervisors,

My name is Jannet Rios, a citizen of Santa Maria. Today I am reaching out to ask you to please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center.

We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables.

The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program provides an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights.

This success has opened the opportunity for state grant funding to expand this program to three other California counties and we hope that Santa Barbara County can be one of them. I hope that you will consider it and support the efforts.

Thank you,

Jannet Rios

Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables. The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program provides an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights. This success has opened the opportunity for state grant funding to expand this program to three other California counties and we hope that Santa Barbara County can be one of them.

Thank you.

Dear Santa Barbara County Supervisors,

Please ensure the Santa Barbara County Public Health Department to applies for state grant funding to create a local Farmworker Resource Center. Our farmworking community deserves recognition and resources for their service as essential workers throughout the COVID-19 pandemic and their lifegiving work every day to feed the country. The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program will provide an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights. Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. We owe an immense debt of gratitude to our farmworker community for their service as essential workers throughout the COVID-19 pandemic and their vital work every day to put food on our tables. The Ventura County Farmworker Resource Program has been a successful model that has helped to improve working conditions for local farmworkers. The program provides an accessible place for farmworkers to receive assistance in navigating public agencies, receive information on wage and hour laws, health and safety laws, resolve workplace disputes and pursue other legal rights. This success has opened the opportunity for state grant funding to expand this program to three other California counties and we hope that Santa Barbara County can be one of them.

Dear Santa Barbara County Supervisors,

Please authorize the Santa Barbara County Public Health Department to apply for state grant funding to create a local Farmworker Resource Center. We can't trust that businesses will treat vulnerable people with dignity or respect. Please set up the resource center to promote justice in the fields.

Thank you.
