Deputy AG Commissioner

# Santa Barbara County ...at a glance

# The Green Team Mission

Promote environmental stewardship in  
County operations through efficient  
use of resources and reduction in  
use of pesticides

# Green Team Projects 2006-07

## Commingled Recycling

- Focus on increasing recycling and reducing trash
- Distributed recycling baskets and 35 gallon recycling carts to 6 additional departments

# Battery Recycling continues...

- Saved over 2100 pounds of batteries from going into the County Landfill
- Delivered instead to Community Hazardous Waste Collection Center

# Vehicles

The County will continue to evaluate environmental process improvements

Future considerations will include:

- Valuation of bio-diesel
- Continued Fleet downsizing efforts
- Performing cost benefit analysis of hybrid vehicle replacements
- Expanding the County's "Ride Share" program
- Using of alternative fuel vehicles as appropriate
- Utilizing paperless remote vehicle reservations
  - ❖ Currently available in Lompoc, Santa Barbara, and Santa Maria

# Energy Partnerships

- Southern California Edison - South County
  - Conducted 12 audits for Partnership municipal facilities and identified over 450,000 kWh savings potential
- PG&E - North County
  - Scheduled meetings have begun for projects similar to South County

# Earth Day 2007

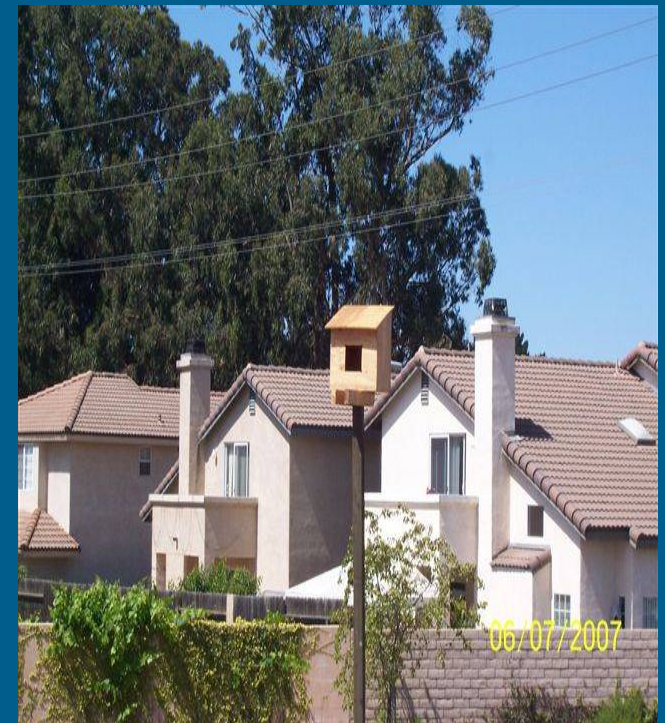

# Integrated Pest Management Innovative Solutions:

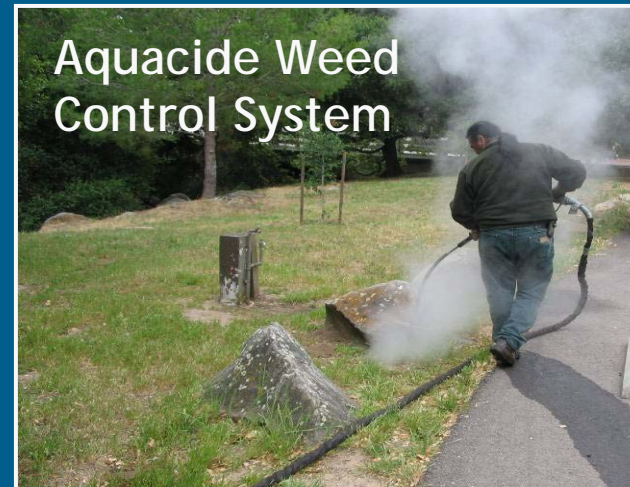

## Public Works

Raptor Perches  
constructed by  
Public Works

Owl Boxes

# Innovative Solutions: County Parks

# Pesticide Free!

# Green Team 2007- 08

- Develop Media Clips using Granicus in conjunction with SBCTV to promote Green Team activities
- Link websites to consolidate Green Team information
- Develop more opportunities with SCE and PG&E
- Outreach to City of Santa Barbara to discuss Green solutions
- Create year long schedule for Green Team meetings to ensure a reduction in the County's Carbon Footprint

# Energy Manager

Key responsibilities of the Energy Manager position would include:

- Leading the County's energy conservation responsibilities and ensuring compliance with AB 32
- Securing grants related to implementing energy efficiencies
- Ensuring all County utility meters are accounted for and correctly allocated
- Managing the measurement of the County of Santa Barbara's carbon footprint
- Providing cost/benefit analyses for the inclusion of green features in new County buildings
- Managing the Green Team
- Proactively implementing cost-saving retrofit measures and implementing new, green, cost-efficient technologies as they become available
