Dear Honorable Supervisors,

Please vote in favor of reducing speed limits as directed by staff. When we talk to parents about what prevents them from allowing their student to walk or bike to school, the speed of traffic is always in the top 3 barriers identified. We also know that a pedestrian hit at lower speed can save a life.

We need to strive for safer streets for all users; this opportunity is a step in the right direction.

Kind regards,  
Kim

Dear Board of Supervisors,

As an avid bike commuter and alternative transportation advocate, I urge you to support the speed limit reductions on the streets and highways recommended by the County staff.

This will make these byways safer for biking and walking.

Thank you for your service,  
Geoffrey Slaff
