Re Pacific Coast Energy OHREP Project – October 11th

To whom it may concern,

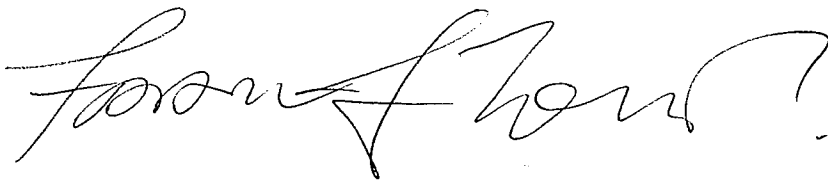

This is for the backing of Pacific Coast Energy Company's proposal for the OHREP project. My name is Frank Tovar I've grew up in Santa Barbara County all of my life and I was lucky enough to get a great job to provide for my family in this same beautiful county that I have always called home, without PCEC giving me a chance as a permanent contractor up on there Orcutt hill lease, I might not be able to have an insurance that would cover for my son's medical expenses from his heart condition he was born with.

The current oil production procedures in place at Orcutt Hill reflect current best safety practices for not only humanity but also for mother nature, PCEC work's with all safety and county department's to maintain up to date regulations.

That is why I dismayed at the recent Planning Commision's decision to deny this OHREP project. I do not believe you could find a better new oil project to take into consideration given all the safety and environmental considerations brought forth by this project.

I believe the OHREP project is the gold standard of environmentally conscious oil production and strongly encourage the Board of Supervisors to approve of this project on Oct. 11th to continue to help the county grow not only financially but to also give other people jobs with this company's growth and success.

Respectfully, Frank Tovar

2016 OCT -5 AM 9:30
COUNTY OF SANTA BARBARA
CLERK OF THE
BOARD OF SUPERVISORS

October 2, 2016

Clerk of the Board
105 East Anapamu Street
Santa Barbara, CA 93101

Re: Pacific Coast Energy Company OHREP Project – October 11th

Dear Sir:

I've called Santa Barbara County home for many years. My son works for Pacific Coast Energy Company (PCEC) on Orcutt Hill. During the time of his employment, I've always known PCEC to be an extremely good operator, neighbor and conscientious company. Most importantly, I appreciate the job opportunity it has given to my son as well as the positive economic impact the company has had on the local economy.

The Orcutt Hill Resource Enhancement Plan (OHREP) is expected to not only continue employment for my son. But also generate significant tax revenue for critical public services like law enforcement, schools, public roads, parks and more. In addition, the project will bring new drilling and construction contractor jobs to our community. OHREP means long-term investment in the County of Santa Barbara and economic benefits that will be enjoyed by our children and our grandchildren for generations.

This is an extremely good and well thought out oil project and I encourage the Board of Supervisors to approve this project for its continuing job opportunities for my son as well as the economic benefits that will come along with this project.

Sincerely,

Linda Tovar

Re: Pacific Coast Energy Company OHREP Project – October 11th

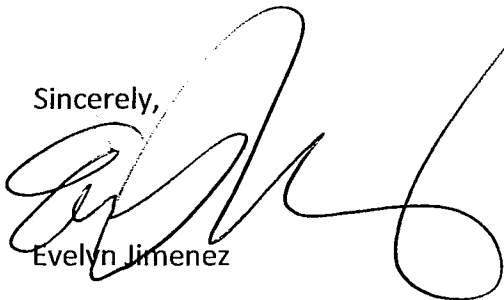

Dear Sir:

I am a longtime resident of Santa Barbara County and a proud supporter of PCEC's Orcutt Hill Resource Enhancement Plan (OHREP) that is the subject of an appeal before the Board of Supervisors on October 11th. This plan is a shining example of how energy production projects should be conducted. OHREP will utilize all of its existing infrastructure and resources to increase oil production on its land. They won't need to add any new steam generators, and they'll use recycled water to create the steam for extraction.

OHREP will create construction jobs and bring in more tax money for Santa Barbara County – all while taking extreme care to preserve the environment. The proposed project will create opportunity and strengthen our economy.

PCEC has done a great deal of work to address issues raised in the initial Planning Commission hearings. I can't think of a single reason not to support this project, and I urge the Board of Supervisors to move forward quickly in approving the project.

Sincerely,

A handwritten signature in black ink, appearing to read 'Evelyn Jimenez', with a large, stylized flourish extending to the right.

Evelyn Jimenez

I support the Orcutt Hill Resource Enhancement Project (OHREP) because:

it guarantees work in a good paying job
for myself & all employees for many more
years to come. Extreme care was taken in
planning and this project is environmentally safe.
