Dear Supervisors - The Santa Barbara public libraries are essential to our community. In this time of uncertainty, knowing we can someday go to the places we love is what is keeping most of us going. One of those places in particular for myself and children is the Montecito library. The online resources provided by the library have been incredibly helpful with homeschooling both of my children. This is such a tough time for all aspects of our community but I urge you to keep the importance of the libraries in mind. I would imagine they are going to be needed more than ever when this is over. Thank you for all you do.
