Subject: Odor complaints in Carpinteria

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear Board of Supervisors,

I am a resident of Carpinteria in the La Mirada Estates. I was very disheartened to read the most recent Independent article regarding our cannabis odor problem. Most specifically the part stating :

"Nelson noted that not a single one of the 3,700 odor complaints filed by Carpinteria Valley residents with the county since mid-2018 has ever been "verified" or enforced by county staff. That's because it's impossible to pinpoint which operation within the clusters of valley greenhouses is to blame for the smell. And without verification, the county cannot require any one operation to install better odor control technology.

"This isn't working," Nelson said. "... It's wildly unsuccessful.... Zero verified complaints is really alarming. Additional planning or studies is not the solution."

How can we still here 6 years later?

How is this possible? Why have you not done more of a community outreach to inform the residents that their efforts to follow your proscribed procedure to document our impacted lives has no value to any solution. I can't tell you how much time and effort this has cost my family to send you these complaints and phone calls to no resolve- in hopes for a better quality of air and life.

We see a solution of scrubbers, but now learn that there is not enough infrastructure for them. Isn't that the cart before the horse? Why do we have grows permitted (or not?) that don't have the infrastructure in place from the get go? There will always be another excuse I can only see from the years we have been waiting for improvement.

Supervisors, Please help us. Please tell us not to record our complaints if they are just going in the trash. What real options are there for the impacted residents and visitors, and Carpinteria's name moving forward. I would love for some real direction for those living through this. The Cannabis growers can drive home after work to distance themselves from the odor and 'organic' masking smells. We residents cannot.

Thank you for your consideration,
Anna Bradley, 1934 Paquita Dr. Carpinteria

Subject: Getting Legal Protection for Horses on the Agenda

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Horses in Buellton needing Rescue

Here we are another atmospheric river winter and over two hundred horses are still trapped standing and forced to lay down in a urine, manure saturated mud pond at Rancho Jonata.

The mud is not good for their hooves and with uncovered hay bins are also forced to eat soaking wet hay with days of rain at feeding time. At night when temperatures go down to freezing are standing and have to lay on ice. This business has a barn and couple pipe corrals however, does not move the horses into shelter or install an inexpensive car port cover in the corral they are kept prisoners. These animal abusers have too many horses crammed in a small corral for decades being exposed to extreme heat without shade to freezing cold and soaking wet in the winter.

There seems to be no way to enforce and punish this extreme animal cruelty until Santa Barbara County board of supervisors get laws in place making this illegal. It breaks my heart to see these horses suffering day after day and year after year and we need to stand up as community and rescue these horses that are in plain view.

Danielle Loveall
Second article in The Santa Barbara Independent

April 14, 2024 Santa Barbara board of supervisors

Horses needing legal protection in Buellton needs to be a priority. Following my original article that Lee Heller responded and said that it would probably be the spring of 2024, where something could be done to put laws in place, or at least county ordinance to provide horses, considered livestock the minimum standard of care. I'm referring to CA penal code-section 597b of UC Davis and where these horses must be provided shelter from extreme weather. These horses have endured another atmospheric river all winter long into the spring and will shift straight to extreme blazing sun and high temperatures.

On March 15, 2024 Joanne Hartman, Lee Heller and I had a conversation regarding how to move forward on legislation that will make this kind of animal cruelty illegal. Supervisor Joanne Hartmann said, she lives there and sees these horses on a regular basis. Joanne Hartmann stated that extreme temperatures in the summer are very hard on horses, especially the older ones-and there is not one bit of shade for them to get out of the sun. She also acknowledges the mud is very bad for horses hooves and causes fungus. These are health concerns also, hay troughs are uncovered and when it rains they are starving and forced to eat wet hay that gets moldy fast. We discussed a petition that they wanted me to have signed by the hypocrites that live there that really don't care about horses, they just want a profit on them. Anyone that has respect for a facility that keeps horses trapped in unhealthy and inhumane conditions are just as cruel. Please do something now to provide legal protection for these horses and others!

Respectfully,
Danielle Loveall

Dear Board of Supervisors,

I am a resident of an EDRN (residential zone) off Foothill, La Mirada. I was not able to attend the April 23rd meeting nor write a letter for your meeting. I understand the Board was told the odor complaints were not specific and could not be verified.

Our area has had odor since 2017. In 2019 I began sending in odor complaints on the official form. Date, time and location is included. Since late January I stopped sending in complaints because they seemed useless.

But today I was wakened again, at 6:03 am with the odor of cannabis coming into my bedroom, this is not the first time, and again this afternoon more foul weed odor permeated my home. I decided to send in a complaint today and a few more specific complaints from the last two prior months. It is obvious the odor is coming from 3561 and 3615 Foothill, where it smells every day. When the wind is right it comes into our EDRN. In 2019 I was told "don't worry, odor will not be allowed past the property line" That has been changed. If odor is past the the cannabis property is can drift anywhere. ie the vapor does not work and can smell like a laundromat and cannabis combined.

I am attaching my complaints and the date they were sent to the planning commission. You cannot reach our home without going through a curtain of cannabis. Every visitor to our home mentions the cannabis smell as they drive to our home.

Additionally, my neighbor has been calling the planning commission person in charge of our area directly with complaints. I believe she used to speak to Kevin and lately she had been calling Jacob until about a month ago when his answering machine was too filled to take a message. If you need her phone log that could be available. Both the marijuana smell and the orange smell of the vapor really bother her and her family.

Everyone is very tired of sending in complaints and many never have. Sadly, another neighbor above Foothill near Cravens, has been trying to sell her home for over a year. Every single person who looks at her home asks about cannabis odor including its affect on resale value. Some realtors say they won't even show in Carpinteria.

What is the hold up on the scrubbers? When the planning inspectors go to properties to see if the vapor is working it means "it is turned on". This is not "working."

Cannabis has been making the growers millions at the cost of our health and property values. Once again, please do something. The growers can afford to clean up their mess now.

Sincerely
Merrily Peebles
La Mirada, Carpinteria

Odor complaints beginning Oct 17, 2019 to April 2024 (although odor started 2017)

2019

Odor on Foothill, near 3561 and up into La Mirada Dr. unless otherwise noted.

Oct 17, 2019: 9:30 am; 10:50 am, 2:15 pm (in my driveway on Paquita)

Oct 18: 8:30 am from 3561 Foothill to Nidever

Oct 19: 9:45 am; 11:00 am; 11:30 (my driveway on Paquita Dr); 1:30 pm on Foothill

Oct 20 visiting friend at 4188 Foothill in afternoon, 3 times the smell came into room

Oct 21: 8:45 am and 6 PM 3561 Foothill and 4:45 PM (my yard on Paquita Dr.)
