A picture speaks a thousand words. Sweden and Norway are neighbors. Sweden did not manage Covid with mask and vaccine mandates and lockdowns. Norway did. This is the picture of what is working and what is not working in leadership. These graphs illustrate what all of the global data now proves, AND reiterates what we have always known about virus and natural immunity. Your policies are a failure...yet every indication is that you will ride your failures into the ground. All 5 of you vote in lockstep despite the new information that proves your policies are not based on data, but rather something else. There are cities, counties and states in this country that have true leadership with leaders who react to bad policy by rejecting it. You all keep rubber stamping bad policy. As the narrative crumbles and new data shines a light on your inability to lead our county out of this, it has become clear that we need new leaders who are dynamic and who can think independently. You treat the tax paying citizens and voters of this county like we are at risk of dying at any minute if we don't stay sanitized, masked, medicated, and 6 feet apart. At the same time you are trying to impose this on the tax paying voters, we have a homeless population that continues to grow despite being told we are in the most deadly, dire, emergency situation pandemic requiring your extreme emergency interventions. Oddly, the growing homeless population does not have the luxury of PPE, basic sanitation, and endless testing. They share food, bottles of water and alcohol, they shake hands, they hang out together unmasked, they have sexual relations, they urinate and defecate in public without the benefit of soap and water. They pick through garbage cans and eat other peoples discarded food, they sleep in doorways and sometimes pass out on the ground with their face on State Street pavement that has been walked on, spit on, and defiled with dog and human waste. I know many of these people because they are in the same general area day after day. My husband and I have brought some of them water, food and check in on them. We live in a city where the board of supervisors wants to reign a tyrannical set of mandates on school children and adults as if our lives depended on it at the same time they are turning a blind eye to the most vulnerable population among us? Your excuses don't cut it anymore. You are being exposed week by week and with each new non sensical move you are inching closer to being completely disrespected by the people you are supposed to serve. We need new leadership that has a public servant focus and independent critical thinking skills. We need to start rejecting "politicians" with a right or left party affiliation and get some intelligent independent leaders with experience in business and civil rights. While on the topic of homelessness, what is your magic wand for the lack of issues on Coast Village Road? Why do they not share in the same (growing) problems that State Street has with homeless in the doorways and passed out on the sidewalks?

Sweden no mandates/ lockdowns
Norway mandates and lockdowns
Who has the correct public health management?
