Subject: Please transmit to all the County Supervisors

Hello Mike Allen,

Please distribute this email to all the County Supervisors. Thanks for your assistance.

I'm asking you to limit greenhouse gas pollution by requiring a zero net increase in emissions. Think about the plague of asthma that people -- especially our children -- suffer from. How can children do well in school if they can barely breathe. And that's just one nasty effect of polluted air.

We need to support all kinds of alternate energy sources, not just pander to Big Oil whose only concern is maximizing their monetary profits. Is this the best we can do?

Thank you. Maggie Gold, Santa Barbara, CA
