Subject: NO TRRP Expansion

I am opposing the vote for this expansion on our coast.

5 Recommendations to OPPOSE this bill were made by the following:

The people of SB are counting on your Research and integrity regarding this project.

- Matt Cotton, Principal, Integrated Waste Management Consulting, LLC
- Nick Lapis, Director of Advocacy, Californians Against Waste
- William O'Toole, President, EcoNomics Inc.
- Gary Petersen, Former State of California Board Member, CalRecycle Former Vice President Waste Management, Inc. Former Director of Environmental Affairs, Recycle America
- Paul Relis, Former State of California Board Member, CalRecycle Lecturer in Waste Management, UC Santa Barbara Vice Chair, Bioenergy Association of California

Thank you

Subject: NO on TRRP Expansion

Dear County Commissioners:

Please vote NO on TRRP Expansion

Key Points:

- The Tajiguas Landfill is a massive Coastal Act violation, and until the scope of the violations and the remediation steps are known, it is premature to expand the use of the landfill.
- Threatened red-legged frogs were discovered on various parts of the property in the last year. The revised TRRP introduces night operations and more traffic that will crush these frogs
- Experts agree that the TRRP is a bad solution to a problem that can be easily resolved with better source separation at a fraction of the cost.

Don't Trash the Gaviota Coast!!

Five solid waste experts, the signatories below listed, recommend NO on TRRP

- Matt Cotton, Principal, Integrated Waste Management Consulting, LLC
- Nick Lapis, Director of Advocacy, Californians Against Waste
- William O'Toole, President, EcoNomics Inc.
- Gary Petersen, Former State of California Board Member, CalRecycle Former Vice President Waste Management, Inc. Former Director of Environmental Affairs, Recycle America
- Paul Relis, Former State of California Board Member, CalRecycle Lecturer in Waste Management, UC Santa Barbara Vice Chair, Bioenergy Association of California

Subject: Oppose Tajiguas TTPR expansion proposal

To the Board of Supervisors of Santa Barbara County:

I am concerned about the cost and long-term feasibility of the proposal to expand the Tajiguas waste processing facility. In view of the high price, the uncertain future of the recycling market intended to finance part of the cost, as well as the environmental concerns involved, it appears wise to investigate all the implications of this expansion project before a decision is made. Reducing wasteful usage is another approach to this problem. Therefore I encourage you to oppose this proposal and consider other options.

To: sbcob
Subject: NO to TRRP - Don't trash the Gaviota Coast!

We implore the Board of Supervisor to oppose the Tajiguas Resource Recovery Project and the industrialization of the Gaviota Coast. and we hope you will stand with the waste experts who recommend a “no” vote.

Clearly there are many issues but the key points remain:

- The Tajiguas Landfill is a massive Coastal Act violation, and until the scope of the violations and the remediation steps are known, it is premature to expand the use of the landfill.
- Threatened red-legged frogs were discovered on various parts of the property in the last year. The revised TRRP introduces night operations and more traffic that will crush these frogs
- Experts agree that the TRRP is a bad solution to a problem that can be easily resolved with better source separation at a fraction of the cost.

Subject: TRRP expansion

Dear Supervisors

I am unable to attend today's hearing, but I would like to urge you to vote no on the Tajiguas Resource Recovery Project. The Gaviota Coast is not the place to be increasing industrial operations, no matter how well-meaning the function of that industry. While we should be doing all we can to recycle and reduce the amount of material going into this or any other landfill, prolonging operations at Tajiguas does that precious environmental setting no good. Please find alternative solutions to our need for better waste handling.

Sincerely,
Deane Plaister
