Please have board address why its "timley" for legal non-conforming while everywhere in the ordinance Legal Business License are require to act with exact days, such as within 24 hour, within 5 days, within 30 days, etc. Why can't it be exact number of days for legal non-conforming licenses so they are pushed to comply?

a. The cannabis operation timely applies for a county cannabis business license in accordance with subsection 50-3(d); and

Also it is unfair to hold up all legal acreage caps just because the CEO's office "presumed" that the application is complete. It should be who has completed all business license requirements first before the ones who have just approved LUP and submitted fees and never do anything else. When do these expire so others can move in the line? If I come in, after all these people with approved land use permits and complete all business license requirements within days, I should be allowed to move in front of the line.

The way I see it Board is influenced by big money. People who can afford the fees in and can hold the space from other smaller operators.

Thanks
