Subject: Support fossil-free new buildings for Santa Barbara County!

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear County of Santa Barbara,

I support taking climate action and making new buildings sustainable and carbon-free!

New all-electric buildings will improve people's health by reducing toxic air pollution; combat climate change by reducing greenhouse gas emissions; and improve housing affordability by saving construction costs and lowering utility bills.

A study for the LA Dept of Water and Power finds that "all-electric new construction results in savings of \$130-\$540 per year relative to a gas-fueled home over the life of the equipment."

All-electric buildings are less expensive to build and less expensive and healthier to live in.

Thank you for maintaining Santa Barbara County's environmental leadership.

Sincerely,

Jordan Briskin

Dear County of Santa Barbara,

Fossil-Free new buildings are what we all need to protect the environment and our people. Santa Barbara is a beautiful place and can be a leader in getting other counties to create fossil-free building regulations.

I support taking climate action and making new buildings sustainable and carbon-free!

The board should implement a plan to use renewable energy to desalinate sea water and use the renewable energy for other county power needs if this dry spell we are in ever ends. Not to mention how much more attractive our county would be if we had an abundance of fresh wate.water.
