Gail,

May I forward this to the Clerk of the Board so it is included in the record. Any correspondence that goes to one, should go to all.

Thanks,

J

Dear Supervisors Williams, Hartmann and Wolf,

I was dismayed to learn of the results of the study on Community Choice Energy. CCE is a vital path to reduced dependence on fossil fuels.

Unfortunately I will be out of town this week when the item comes up on your Oct 3 agenda.

So I simply ask that you keep our options for Community Choice Open.

I suspect the study is flawed, but in any case the citizens of SB County need and should have options to purchase electricity from renewable resources. Our community understands the damage that climate change is causing and the enormous risks of not lowering GHGs.

Give us options. I look forward to Santa Barbara joining the other communities that have Community Choice Energy and are finding benefits financially as well as in peace of mind that we are choosing to leave a livable planet for our children and future generation.

Best,

Gail
