Dear Shila,

I tried calling you did not had your extension no. I received your msg.

Dear Santa Barbara justice,

environmental justice matters to me and how pollution has affected my community.

I receive this announcement late, yesterday I ly comment I have is if Santa barbara county use the lands they have for farming and growing food and use irrigation in many areas because farming they won't have hazardous air or pollution. Or to have fire because water travels in ground and stop the fire from heat.

I traveled many times to Santa Barbara to see if there is any opportunity to farm, because I farm in very hot area, and not productive, Santa barba is close to ocean and weather is very important to be cool.

That is my comment

If you have question pls let me know.

I be happy if you send me your YouTube link.

Best.
