Dear Naked Emperors,

How could this be? The words renewable energy and Caterpillar diesel generator in the same sentence???

I thought SB County and the State were going fossil free???

I hate to interrupt your meaningless and hypocritical virtue signaling here but let's consider the context.

The County of SB has contracted with 3CE energy to deliver "absolutely reliable" ghg free energy

AND the county is building a roof top solar panel array at the Betteravia govt center to augment the 3CE energy along with battery backup.

AND yet, you don't have enough confidence in the above so you are going to install what you yourselves would term a filthy dirty climate existential threatening **DIESAL GENERATOR** as a back up to your already **redundant green energy power sources???**

What would Greta have to say about that? SBCAN? 350.org? The fearless Grandmothers? Nick Welsh?

Where are you going to get the diesel once you run the oil industry out of the country?

Andy Caldwell
