**Southern California Edison  
Microgrid Incentive Program**

**RE: Isla Vista Community Microgrid – Backup Generator**

Dear SCE Microgrid Incentive Program Staff,

I am writing to attest to the following:

We understand that the proposed Community Microgrid is designed to provide clean, reliable backup power to all of these facilities through solar energy and battery energy storage systems in the event of a utility outage.

The County of Santa Barbara Sheriff's Station at 6504 Trigo Rd, Isla Vista, CA 93117 serves as a critical facility during extended power outages and natural disasters, providing essential emergency response services such as law enforcement, public safety coordination, search and rescue operations, and support for emergency medical responders.

While this facility currently has a fossil fuel generator onsite, the County will only operate the generators in the event that the Community Microgrid is unable to provide backup power during an outage.

Sincerely,

Kirk Lagerquist  
Director, General Services Department

**RE: Isla Vista Community Microgrid – Community Resilience Service Facility**

I am writing to attest to the following:

We understand that the proposed Community Microgrid is designed to provide clean, reliable power to Isla Vista through solar energy and battery energy storage systems in the event of a power outage.

Embarcadero Hall serves as a Community Resilience Service Facility during extended power outages and natural disasters by providing a safe, publicly accessible gathering space where residents and students can access critical resources such as communications, device charging, heating or cooling, and essential information.

Sincerely,

Jesús Armas  
Director, Community Services Department

**RE: New Cuyama East Community Microgrid – Community Resilience Service Facility**

I am writing to attest to the following:

The Cuyama Valley Family Resource Center fully supports the New Cuyama East Community Microgrid. We understand that the proposed Community Microgrid is designed to provide clean, reliable power to the Cuyama Valley Family Resource Center through solar energy and battery energy storage systems in the event of a power outage.

The Cuyama Valley Family Resource Center serves as a **Community Resilience Service Facility** during extended power outages and natural disasters by bringing together community members, coordinating local responses to local needs, and creating new opportunities that strengthen families and empower the community.

Sincerely,

Jesús Armas  
Director, Community Services Department

**RE: New Cuyama East Community Microgrid – Backup Generator**

I am writing to attest to the following:

We understand that the proposed Community Microgrid is designed to provide clean, reliable backup power to all facilities through solar energy and battery energy storage systems in the event of a utility outage.

Fire Department Station 27 at 41 Newsome St, New Cuyama, CA 93254 serves as a critical facility during extended power outages and natural disasters, providing essential emergency response services, including firefighting, rescue operations, and medical aid.

While this facility currently has a fossil fuel generator onsite, the County will only operate the generators in the event that the Community Microgrid is unable to provide backup power during an outage.

Sincerely,

Kirk Lagerquist  
Director, General Services Department

**RE: New Cuyama South Community Microgrid – Community Resilience Service Facility**

Dear PG&E Microgrid Incentive Program Staff,

I am writing to attest to the following:

We understand that the proposed Community Microgrid is designed to provide clean, reliable power to New Cuyama South through solar energy and battery energy storage systems in the event of a power outage.

The Cuyama Valley Recreation District Montgomery Hall Building serves as a Community Resilience Service Facility during extended power outages and natural disasters providing a publicly accessible location where residents can gather, access essential services, receive information, and seek shelter during grid outages or emergencies.

Sincerely,

Jesús Armas  
Director, Community Services Department
