Hello Tatiana,

I would like to have in record that upon our meeting with Jason with Ashley Vance, and Brian Bucher from Geo Solutions, as they came to do a site visit, with our permission to walk on our property, that Brian (from Geo Solutions) recommended that the retaining walls surrounding our property (THAT WERE APPROVED OF BY THE COUNTY years ago) should remain for the safety of our home. After Brian and Jason were here, they decided that those walls were important to keep there. This was not my encouragement but Brian Bucher's from Geo Solutions recommendations to Ashley Vance.

Please note this in the paperwork.

Thank you.

Mindy Noyes

A copy of the second record of survey and site plan is also attached. The site plan drawings cross-reference the new record of survey in addition to the record of survey from 1929 and the topographic survey from 2020. On grade stairs and rock wall are still show as being partially on the 2632 property. Please let me know if you have any questions.
