

COALITION TO PROTECT GOLETA BEACH

We support the Santa Barbara County Parks Division's Goleta Beach 2.0 Plan to protect Goleta Beach Park by relocating sewer, gas, and utility lines, the bike path, and parking spaces out of the critical erosion zone and expanding the beach by an acre. The lines should be moved inland to avoid sewage spills and the unpermitted rock revetments should be removed to maintain and enhance the Park and Goleta Beach for future generations. Goleta Beach 2.0 is an important model for adapting to the effects of Global Climate Change.
