ay! question: how/why on earth did Lisa Plowman give an ok to Autumn Brands entirely ineffective odor system?
and one day prior to 3/10 meeting. Seems rather sneaky and underhand
can this be overruled by Board now?
more baffling, why does Plowman still have this job... after years of complaints about her?
As anna writes, this would be a terrible precedent.

Unfortunately, Autumn Brands elected to put in the Genesis Air system and the OAP was only finalized the day before the 3/10 meeting. From a test done in July effectiveness at the vents was 41%, while Envinity tests done a few years ago showed 84% effective rate at the vents. I only found out the day of the meeting of the Board meeting that Autumn Brands had submitted their revisions to the OAP on Dec. 18 and then received their approval on March 9. I did ask to see the OAP before the 3/10 meeting but as it hadn't been approved yet, P&D (Petra and Errin Briggs wouldn't send it to me). This product is quite a bit cheaper. A representative from APCD spoke virtually at the meeting and said APCD as of 2019 didn't recommend using PCO systems for cannabis because of ozone creating problems, but Hans Brand and the owner of Genesis Air said there were no health issues related to this use of this particular system. Also a state agency didn't recommend this system for cannabis. As far as I understood this system has never been used in cannabis greenhouses. The system is widely used in airports, not sure of all the other

uses. Laura definitely brought up her misgivings, but then Lavagnino said meeting today wasn't about the use of different systems.

As Laura wrote me yesterday when the ordinance was written last year, the expectation was that growers would be using Envinity.

When I get a chance I will ask for Autumn Brands' new OAP to see how the hired engineer could classify Genesis Air as MTCF (Multi technology carbon filter) or an equivalent.

Jill and I spoke to Hans Brand - he said he would have his 51 units in by today, 3/13. 2 of his greenhouses aren't cultivating at the moment and he has dropped his application for converting part of one of his processing rooms to manufacturing. Hopefully when the county does their testing at the property line beginning March 19, we will hear the results for all the greenhouses. When complaints are going to be made we're going to be back to the same problem - immediate neighbor G&K with nothing but vapor phase and Sun Coast Bloom (3508 Via Real) across the creek from Autumn Brands) with Envinity, the county without actual multiple testing at property lines (which part of the property line we won't be able to identify the culprit).

Unfortunately with Lisa Plowman and Gesyntec's approval of Genesis Air, there now is a precedence set for the use by others of Genesis Air. Both CP1 (4505 Foothill) and Emmawood (5888 Via Real) have already received their shipments of Genesis Air equipment and they're just waiting for their revised OAP approval so I wouldn't be surprised if they meet the deadline of March 18, or for sure by March 31 (when business licenses get revoked), but then there is a 60 day appeal period. The other grow that is planning to use Genesis Air is Valley Crest, 5980 Casitas Pass, next door to Rose Story Farm. When the manager spoke he said Valley Crest had already received and installed the 45 units, but Dani Hahn from Rose Story Farm said he either was lying or they were not effective. Valley Crest was the one project originally denied and is the subject of the lawsuit by the Coalition.

I'm working on figuring out the new complaint form and will hopefully be able to share it with others out here on the farm. It has not been easy to find online nor to utilize. Sadly, this seems to be true for many throughout the valley. It's a challenge at best. And, I might add, the more challenging it is to use, the fewer reports you all will receive. That does not seem right. We need to do better.

Just to let you all know. The stench was absolutely horrendous over the weekend, beginning around 3 pm on Friday. I'm not sure whether Valley Crest simply works with impunity when there is no monitoring OR if there is some other reason why weekends are so hideous out here.

Weekends (particularly Sundays) have always meant downtime here at the farm .. our employees are home with their families and we try to enjoy the downtime. However it is impossible to sit outside on the weekends due to the cannabis stench. We now look forward to just being somewhere other than our residence from Friday to Monday.

I understand that Valley Crest has their new system of odor abatement installed and running (?). If so, I can tell you it simply does not work. This is really so depressing. Why when the Envivity product reduces odor in the 80-90th percentile, are they being allowed to use another system that has much poorer results?

All we are asking for is to be able to enjoy our property, not to mention run our business without the constant stench of marijuana.

Please let us know next steps.

Thank you.

Terrible stench this morning.. my 94 year old mom upon opening her door first thing.. she is currently dealing with a respiratory infection.. she's on antibiotics and feels miserable. This does not help..

I've filled out complaint form but will continue to alert all..

Yep. Definitely. I drove by Valley Crest today at 9:30am on my way to a meeting and the smell was horrendous. I drove back by at 12 noon after the meeting and the smell was still strong. I will file a complaint tonight when I can free up the time to do it.

Still can't use the odor complaint form. It will not allow us to input address or 'drop a pin'

Terrible stench tonight, March 22 Sunday 5:52 pm.
Please consider this the complaint form.

Dani & Bill Hahn
5950 casitas pass road.

Subject: Re: Help

complaint form issues:

I can get it to this point (see below) but there is no way to advance the screen to next question
I got it to work a few weeks ago but I cannot do it now

I'm wondering ... if I can't do this (with help.. I've had Danelyn show me a few times) How is the
gen pop supposed to deal? It is frustrating and many people will just quit trying (as I have done on multiple
occasions) because it keeps sending me back to a blank screen start over.

I'm wondering how many complaints you've gotten in the last month and is this because of the form?
I can tell you all, the smell is still horrid. So it's not because the odor is resolved.

Hi Dani,

Thank you for your email. P&D will begin conducting compliance inspections after March 18, 2026 to ensure operators are in compliance with the odor ordinance amendments.

Feel free to call me via telephone 805-934-6265 if you need additional assistance navigating the online complaint form:

We need to be able to master the new complaint system. Friday the 6th was the date that valley crest said you looked at their scrubbers and Friday the 6th the odor was absolutely terrible. If they were installed and working properly there should not have been odor beyond the property line?

Thanks so much for your help.

Subject: Immediate Demand to Halt Offshore Drilling Operations Near Santa Barbara!!! RESPECT OUR OCEANS!!!

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

To Whom It May Concern,

I am writing to express my **profound outrage** at the decision to move forward with **reopening offshore oil drilling operations along the Santa Barbara coastline**, an area that is not only **ecologically sensitive, but historically scarred by catastrophic oil spills!**

The memory of the **2015 Refugio spill is not distant history, it is a warning. Thousands of gallons of crude oil poisoned marine ecosystems, devastated wildlife, and polluted one of California's most treasured coastlines. That damage lingered for years. To now propose restarting operations in this same region is not just irresponsible, it is reckless and completely DISRESPECTFUL to our local community and the ANIMALS that live here!**

This coastline is home to **fragile marine habitats, migratory species, and a coastal economy built on tourism, recreation, and environmental stewardship. A single failure - whether from aging infrastructure, human error, or extreme weather—could once again cause irreversible harm.**

It is **unacceptable to prioritize short-term profit over long-term ecological survival.** It is unacceptable to override local and state protections designed to safeguard these environments. And it is unacceptable to ignore the growing climate crisis, which demands a transition away from fossil fuels, not a doubling down on them.

This is not just a policy disagreement. **It is a moral failure.**

I urge you in the strongest possible terms to **immediately halt any plans to restart offshore drilling operations in this region. Withdraw from this project. Invest in safer, forward-looking energy solutions that do not threaten coastal ecosystems or communities.**

The public is watching. The environmental consequences are real. And history will not look kindly on those who choose profit over preservation!!

RESPECT US and RESPECT OUR OCEANS!!!

Dear all,

Sorry to say, but once again we got a problem. Paul Ekstrom is right. After a few intervals of improvement, it Stinks again with that rancid Weed smell.

Some days, it's an issue from Nidever all the way out to Las Casitas on Foothill.

My sense - from smelling it and speaking to neighbors- is we have zero enforcement. from Planning & Develop. Among the worst areas, is outside the Brands' operation where we are told Ms. Plowman has allowed an unproven, uncertified odor abatement system to proceed? Huh?

How does the community get that investigated and reversed? And who is handling enforcement at the County?...because on some days, it's worse than ever.

There are some serious, big issues facing Carpinteria, the Valley and the County; all the more reason, we need the noxious Weed odor matter resolved, eliminated and behind us.

with regret,
Annie & Bob Lesser
