

For: May 19, 2015 Supervisor Meeting Appeal (Case No14APL-00000-00028)

ADDED NOTE 5/13/15

To the Supervisors:

COUNTY OF SANTA CRUZ
CLERK OF THE COUNTY
2015 MAY 13 PM 3:09

It took 9 months to get my blood pressure down after the being ejected from the June 6, 2014 meeting without a single comment. Of course, my blood pressure is back up. It was very distressing trying to figure out which Concept design the minutes of the June 6th were referring to, since we mitigated the Guidelines 4.6 & 4.7 with our Concept 3 design.

We had to wait 6 months for the report on our project only to find out that our second story is located "solely" over the garage. What is this nonsense? Ryan Cooksey walked through our kitchen, sat in the dining room and made remarks about our roughly 400 square foot converted garage. Now, is he claiming that our 1350 square foot house has a 700 square foot converted garage? Do we have to eliminate the garage to make SBAR happy? (See attached Architectural layout of upper & lower levels.)

Who made up the minutes to the June 6th meeting? We were not there. We were ordered to leave. A vote of 7 to zero was taken, Dylan started shouting "Side-Loading Side-Loading", when my architect stood up and we were ordered to leave by Alex Pujo within 15 seconds of the start of the meeting.

Where was Alex Tuttle the Supervising Planner? Hiding under a chair somewhere? Why did he not tell Dylan Chappell to sit down and shut-up? When Alex Pujo ordered us to leave the meeting, why didn't Alex Tuttle tell Alex Pujo that you can not order the appellant to leave without giving them the opportunity to speak. Alex Tuttle should be fired for gross negligence.

With regard to the Planning Commission meeting in December 2014 and as stated before, three of the members voted for whatever SBAR claimed, Cecilia Brown had her own agenda about what would be nice like offsetting the 2nd story. She did not discuss guidelines 4.6 or 4.7 contrary to the staff report. Chairman Blough was the only person willing to discuss the issues of 4.6 and 4.7, but already had 4 members committed to vote against our project.

This has been very stressful on my life. I hope that I can survive this nonsense. My mother died of a stroke caused by high blood pressure.

Ed Kalasky Ph:964-3070 D2Bike@Juno.com

Ps: I can provide blood pressure measurements, if necessary.
