

**AMENDMENT NO. 1 TO THE AGREEMENT  
WITH GEOSYNTEC CONSULTANTS, INC (BC22054)**

**THIS AMENDMENT** to the Agreement for Services of Independent Contractor entered into on July 1, 2022 (hereafter Amendment No. 1), is made by and between the County of Santa Barbara, a political subdivision of the State of California (hereafter COUNTY) and Geosyntec Consultants, Inc. with an address at 924 Anacapa Street, Suite 4A, Santa Barbara, CA 93101 (hereafter CONTRACTOR).

**WHEREAS**, the parties hereto, entered into an Agreement (BC22054) for regulatory compliance consulting services as requested by the COUNTY, commencing on July 1, 2022; and

**WHEREAS**, these amendments are being made pursuant to Article 25 of the Agreement, which allows for the Agreement to be amended; and

**WHEREAS**, the original Agreement amount for the project was in the amount of \$369,370; and

**WHEREAS**, additional work is necessary to support regulatory compliance pertaining to the optimization of the leachate collection and recovery systems, and geotechnical evaluations for the Tajiguas Landfill;

**NOW THEREFORE**, COUNTY and CONTRACTOR agree to amend the Agreement as follows:

1. EXHIBIT A, First Paragraph, is hereby amended to read:

CONTRACTOR shall provide professional services as set forth in the CONTRACTOR'S proposal dated April 28, 2022 included as Attachment A-1, and as set forth in the CONTRACTOR'S proposal dated October 28, 2022 included as Attachment A-2, as herein attached and incorporated by reference.

2. Attachment A-2 is added in its entirety as attached hereto and incorporated herein by reference.

3. EXHIBIT B, Paragraph A, is hereby amended to read:

For CONTRACTOR services to be rendered under this Agreement, CONTRACTOR shall be paid a total contract amount, including cost reimbursements, up to but not to exceed \$432,360.

4. The terms and provisions set forth in this Amendment No. 1 shall modify and supersede all inconsistent terms and provisions set forth in the Agreement (BC22054). The terms and provisions of the Agreement, except as expressly modified and superseded by this Amendment No. 1, are confirmed and shall continue in full force and effect, and shall continue to be legal, valid, binding and enforceable obligations of the parties.

//

//

//

//

IN WITNESS WHEREOF, the parties have executed this Amendment No. 1 to be effective on the date executed by COUNTY.

**Reference: Proposal for Construction Management and Oversight, Generator Evaluation, and Project Management  
Tajiguas Sanitary Landfill Leachate Collection and Recovery System 1,2,3 Upgrade Project**

Dear Ms. Gonzales-Knight:

Geosyntec Consultants Inc. (Geosyntec) prepared this proposal for the County of Santa Barbara Resource Recovery and Waste Management Division (RRWMD) to provide construction management and oversight services. Services also include other tasks related to the reconfiguration and optimization of componentry and infrastructure of leachate collection and recovery systems (LCRS) #1 through #3 (LCRS 1,2,3) at the Tajiguas Sanitary Landfill (Landfill). Construction upgrades of the LCRS 1,2,3 systems will be based on a previously prepared civil design not intended to change the functionality of the LCRS systems, but to add minor engineering and best practice improvements. Additionally, the reconfiguration and optimization will:

- upgrade the layout of the equipment complex (Complex) to increase safety for on-site personnel who operate the LCRS system,
- protect the Complex from storm water damage, and
- determine the most appropriate approach to providing backup power to the systems.

The civil design was distributed to select contractors via a public bidding system wherein RRWMD selected the most appropriate contractor for the work.

Geosyntec prepared this proposal based on conversations and direction from RRWMD, and our current understanding of the level of effort needed to conduct the tasks which are described in detail below.

### **Task 1. On-Site Construction Management**

During construction of the civil upgrades in the LCRS 1,2,3 Complex, Geosyntec will provide construction management oversight of the RRWMD selected construction contractor. The on-site Construction Manager's role will be to act as the intermediary between RRWMD, and quickly address questions and/or concerns that may arise during the construction activities as well as to ensure compliance with the overarching design drawings. The Construction Manager will coordinate daily with RRWMD to discuss

RRWMD – Proposal for Construction Management and Oversight, Generator Evaluation, and Project Management  
LCRS 1,2,3 Upgrades  
October 28, 2022  
Page 2

status and/or pertinent findings or changes. Significant changes or design modifications that do not have a schedule or financial impact will be discussed with RRWMD to gain approval for these changes. Identified financial adjustments will be immediately communicated and coordinated through to RRWMD to facilitate approvals for the proposed changes in writing from RRWMD, prior to field implementation. Most importantly, the Construction Manager will monitor schedule compliance and work with the Contractor to remedy schedule deviations and/or coordinate with RRWMD to comply with RRWMD's Habitat Conservation Plan requirements. Based on current understanding of the execution schedule, this proposal included 13 days of construction management oversight along with pre-execution planning.

Task 3 Estimate: \$48,110

### **Task 2. Backup Generator Specifications and Recommendations**

Geosyntec will conduct a load analysis of the electrical systems that are supplied power from the service drop located in the LCRS 1,2,3 Complex. The load analysis will be used as a baseline for identification and specifications for a portable backup generator capable of supplying backup power in the event of power failure(s) at the LCRS 1,2,3 Complex. Geosyntec acknowledges that RRWMD wishes to identify a generator that complies with Environmental Protection Agency (EPA) Tier 4 regulations and is powered by a motor of less than 50 brake horsepower. Geosyntec will identify a generator(s) that can supply the unique 3-phase, 4-wire, Delta 120/208/240 Wild Phase service identical to the service provided by the existing? electrical service provider. Once identified, Geosyntec will assist RRWMD in developing Guide Specifications to be shared with vendors to prepare cost estimate quotes, or to be published for public bidding. Design work to integrate the backup generator (transfer switch, circuit isolations, panel upgrades, etc.) will be described in detail in a subsequent proposal submitted to RRWMD in early 2023.

Task 4 Estimate: \$5,720

### **Task 3: Project Management and Client Communications**

Geosyntec staff assigned to the project will communicate frequently with the COSB and selected construction contractor project team members to provide: project status and schedule updates, potential or proposed field changes that may result in either cost or schedule impacts, and other pertinent project observations or questions. The Geosyntec Project Manager will coordinate closely with RRWMD staff and provide periodic, as-needed, updates during the implementation of the tasks described above.

Geosyntec has also included attendance in four (4) bi-weekly, 30-minute calls with the RRWMD to discuss project status and answer questions as needed. Geosyntec proposes to invoice monthly for services provided.

Task 5 Estimate: \$9,160

RRWMD – Proposal for Construction Management and Oversight, Generator Evaluation, and Project Management  
LCRS 1,2,3 Upgrades  
October 28, 2022  
Page 3

**Terms and Conditions**

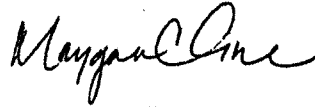

Geosyntec assumes that the proposed services will be conducted under the terms and conditions of the existing Service Agreement contract between Geosyntec and the RRWMD. The total estimated costs for the work described above are: **\$62,990**. Cost Estimate details are provided as Attachment 2.

This proposal is valid for 90 days. Geosyntec continues to appreciate the opportunity to work closely with the RRWMD on these technical projects. Please contact us if you have questions.

Sincerely,  
Geosyntec Consultants, Inc.

Dan Dowdy, P.E.  
Principal Engineer

Maygan Cline, P.G.  
Principal Geologist
