- D. Pursuant to CEQA Section 15074, adopt the Mitigation Monitoring Plan (Attachment 2A of the Board letter for the MND) for this project.

**Summary Text:**

The Public Works Department prepared a Mitigated Negative Declaration (MND) to evaluate the environmental effects of the Jonata Park Road Bridge 51C-226 replacement project. This Project will replace the Jonata Park Road Bridge by spanning the existing bridge with a new longer structure that raises the roadway profile. This will improve the sight distances and design speeds to be more in line with current design standards, while minimizing the environmental impacts and preserving the rural character of the existing location. An Initial Study and Negative Declaration (ND) were completed in 1999 (99-ND-6) and approved by your Board on March 28, 2000 for the replacement of both bridges on Jonata Park Road spanning Zaca Creek (51C-225 and 51C-226). The current Initial Study and Mitigated Negative Declaration have been prepared as an update to the 1999 ND, to address changes in the project and environmental conditions since 1999.
