Subject: Deny Exxon trucking project - Upcoming Board of Supervisors Meeting

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear Santa Barbara County Board of Supervisors,

I urge you to deny this dangerous project as recommended by the Santa Barbara Planning Commission.

In addition to the significant and unavoidable risks of spills from trucking the oil, the purported benefit of producing oil from the offshore platforms and processing it on the Gaviota coast would bring with it unacceptable risks of offshore oil spills, air pollution and toxic fire and smoke risks that were not analyzed in the EIR, which focused narrowly on trucking impacts.

The recent oil spill off of Orange County underlines the severity of these risks. In addition, ExxonMobil's facilities were the largest sources of air pollution in the county and contained dangerous and toxic materials in an area that has burned by wildfire twice in the 6 years since the facilities have been shut down. We were fortunate that oil and dangerous gases were not present at the site during the recent Alisal fire, which burned onto ExxonMobil's property.

It is not just that the trucking routes are along sections of road with above average accident rates, there have been specific and recent instances of oil tankers on this route spilling oil into rivers and starting fires. In fact, on October 11 -- the same day as the Alisal fire -- an oil tanker crash near Orcutt caused a fire in Eucalyptus trees.

Thank you for denying this dangerous and unacceptable oil trucking project.

Sincerely,

Roberta Stern

Subject: Uphold the Commitment to Remove the Montecito Ring Nets

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear Supervisors,

As a Santa Barbara County resident, I'm writing to urge the Board to require the Project for Resilient Communities (PRC) to uphold its commitment to remove the Montecito ring nets.

The ring net project was proposed and approved as a temporary method of providing additional protection to Montecito communities until mountain slopes have revegetated. That time has now come. Slopes are thickly revegetated and permit deadlines are approaching.

The blockage of San Ysidro Creek last January demonstrates that the nets do not function as intended and rather trap small sediment material that would naturally replenish local beaches.

The failure to maintain the nets, for a variety of reasons, only further demonstrates that the nets do not function as intended.

So many of our creeks and rivers already suffer from a legacy of historic alteration for flood control. New permanent barriers are not the solution.

It's time to make good on its promise. Please require the PRC to uphold its commitment to remove the ring nets.

Regards,
Doria Taylor
