**Subject:** Board of Supervisors meeting 2/6/18 Agenda item A-4

To the Board,

This comment is being submitted for agenda item A-4 for the 2/6/18 board meeting. I wish to remind the board that they must treat all parties involved in the Montecito slide/fire in the same manner the board has treated involved parties in past disasters. This response would include taking action against entities that caused or contributed to the fire and mudslide. At this time, both the Montecito Water District and Southern California Edison have been accused of causing the disaster or contributing to it. In the past, the Board of Supervisors have taken action against entities who caused disasters, including actions that were intended to close down entire industries in Santa Barbara County and the State of California, even businesses in those targeted industries that had no hand in the disaster.
