- b. The Lot Line Adjustment will not result in a greater number of residentially developable lots than existed prior to the adjustment. For the purposes of this Subsection B.3 only, a lot shall not be deemed residentially developable if the documents reflecting its approval and/or creation identify that 1) the lot is not a building site, or 2) the lot is designated for a non-residential purpose including, but not limited to, well sites, reservoirs and roads. A lot shall be deemed residentially developable for the purposes of this Subsection B.3 if it has an existing one-family dwelling constructed in compliance with a valid County permit, or existing and proposed lots comply with all of the following criteria.
- 1) **Water supply.** The lot shall have adequate water resources to serve the estimated interior and exterior needs for residential development as follows:

1. The new contract or contracts will enforceably restrict the adjusted boundaries of the lot for an initial term for at least as long as the unexpired term of the rescinded contract or contracts, but for not less than 10 years.
2. There is no net decrease in the amount of the acreage restricted. In cases where two lots involved in a lot line adjustment are both subject to contracts rescinded pursuant to this section, this finding will be satisfied if the aggregate acreage of the land restricted by the new contracts is at least as great as the aggregate acreage restricted by the rescinded contracts.
3. At least 90 percent of the land under the former contract or contracts remains under the new contract or contracts.
4. After the lot line adjustment, the parcels of land subject to contract will be large enough to sustain their agricultural use.
5. The lot line adjustment will not compromise the long-term agricultural productivity of the lot or other agricultural lands subject to a contract or contracts.
6. The lot line adjustment is not likely to result in the removal of adjacent land from agricultural use.
