Dear County of Santa Barbara,

I support taking climate action and making new buildings sustainable and carbon-free!

New all-electric buildings will improve people's health by reducing toxic air pollution; combat climate change by reducing greenhouse gas emissions; and improve housing affordability by saving construction costs and lowering utility bills.

A study for the LA Dept of Water and Power finds that "all-electric new construction results in savings of \$130-\$540 per year relative to a gas-fueled home over the life of the equipment."

All-electric buildings are less expensive to build and less expensive and healthier to live in.

Thank you for maintaining Santa Barbara County's environmental leadership.

Sincerely,

Utkarsh Nath
