1. The arrow indicates RECOVERY. Significantly higher number have recovered than are actively infected. This means the crisis is behind us.
2. The red line represents new cases, this line has been relatively flat THE ENTIRE TIME!
Remember, they predicted an **exponential** growth of infections and death. It never happened- **ANYWHERE!**
3. The blue line looks impressive, until you do the math. This virus has been in our county for 5 months. 500 confirmed cases out of a population of 440,000! Every other infected person was asymptomatic.
