TO: Board of Directors
Santa Barbara County Flood Control and Water Conservation District

FROM: Phillip M. Demery
Public Works Director

STAFF CONTACT: Thomas Fayram, Deputy Public Works Director, Ext. 3436
Jon Frye, Engineering Manager, Ext. 3444

SUBJECT: **Franciscan Sediment Basin Project (SC8314), First Supervisorial District**

Recommendation(s):

That the Board of Directors:

- A. Approve plans and specifications for the Franciscan Sediment Basin Project (SC8314); and
- B. Authorize the Public Works Director to advertise and receive bids for the project.

Alignment with Board Strategic Plan:

The recommendations are primarily aligned with Goal No. 2. A Safe and Healthy Community in Which to Live, Work, and Visit.

Executive Summary and Discussion:

Pursuant to CEQA Guidelines, your Board approved the Negative Declaration for the Franciscan Sediment Basin Project (98-ND-45) on February 2, 1999. The purpose of the project is to construct a sediment basin and channel improvements off of Via Real between Cravens Lane and Santa Monica Road upstream of the existing Franciscan Culvert in the Carpinteria area.

In the past few years, Highway 101 and Via Real have been closed several times during storm events. The sediment basin and channel improvements will reduce the amount of sedimentation within the existing Franciscan Culvert, Kim's Basin and the Carpinteria Salt Marsh as well as improving drainage to the surrounding area, particularly on Via Real and Highway 101.

Mandates and Service Levels:

Direction by the Board will not change programs or service levels.

Fiscal and Facilities Impacts:

The estimated construction cost for the project is \$700,000 to \$800,000 and is currently in this fiscal year's budget (Dept: 054, Fund: 2610, Acct: 8200, Program: 3005). This project is also identified in the County's Capital Improvement Plan.

Special Instructions:

Direct the Clerk of the Board to send a copy of the minute order of this action to the Flood Control District office, Attn: Christina Lopez.
