Subject: Lompoc Wind Energy Project Approval

Dear Santa Barbara County Board of Supervisors,
I strongly support the County to approve the Lompoc Wind Energy Project. It would a great step for our county to do its part and lead the way in alternative energy technology. It is about time that local communities went out and did something for our environment and energy independence.

Sincerely Ronald J Garber, BS, MS, DVM and Rebecca Garbett BS, DVM

I am writing to inform you that I am a strong supporter of the Lompoc Wind Energy Project and I urge you to approve this application.

The problems of global warming and dwindling energy supplies must be addressed and I believe wind power has a role to play in meeting future energy requirements. We must invest in renewable sources of energy and we must view this project as part of a learning curve as we seek to development more efficient and environmentally-friendly ways of supplying our energy needs.

In the end we will not have to live with the impact of this decision as much as our children will. That doesn't mean that we should be selfish in considering the future.

Visitors to this area will not be put off by a few wind turbines. I think wind turbines look great and don't actually spoil our landscape. How can something so ecologically beautiful be thought of in this way when we already have eyesores like offshore drilling?

I am all for renewable energy and the investment it will bring into our local community: not just in terms of the community fund but also in contacts for local businesses.

In conclusion I hope you agree as I do that this project is vitally important and deserves your full support.

Subject: Lompoc Wind Farm Project

Dear County Board of Supervisors,
I am writing to say I support the proposed wind farm and am encouraging you to do so as well. I am hoping this project will provide cleaner energy to help reduce CO2 emissions generated by other sources. This would be a local source of clean energy. Be courageous, let's try something new.

I trust you will consider all points of view and do what is best.
Keep the big picture in mind.

Sincerely,
Lydia Deems

Subject: Lompoc Wind Farm

Dear Board of Supervisors,

Next Tuesday you will have the opportunity to approve the Lompoc Wind Farm. As a business executive and member of the Board of Directors of the Community Environmental Council I believe that approving this project is a must. This is one of the all-to-rare win-win moments; a major economic investment in jobs and renewable energy with unprecedented wildlife protections. If you are in support of this project, which I hope all of you will be, please do everything possible to signal in your approval that Santa Barbara is open for business for renewable energy projects that have been carefully thought out and that are consistent with our land use policies.

By voting in support of this project you will stimulate our economy and protect Santa Barbara County and the country from its addiction to foreign oil and all the economic and political negatives that follow from this addiction.

Respectfully,

Paul Relis

Subject: Lompoc Wind Energy Project

Dear Supervisors:

I am a strong supporter of moving our region away from fossil fuels and helping to lessen the impacts of climate change. This is why I also support energy conservation and increased efficiency, renewable energy and sustainable transportation measures.

The Lompoc Wind Energy Project is the first utility-scale renewable energy project in our county, so your handling of it will have major implications for future projects of this kind. While I have read about the likely biological and visual impacts of the project, I believe that the project's ability to provide 10 percent of our county's electricity demand is a major benefit to our region. The impacts from this wind power project are far less than from new natural gas, coal or nuclear plants -- and it will greatly enhance our county's energy grid reliability and our energy independence! The County will also benefit from new jobs, cost-effective power and tax revenue.

I'd like to voice my full support for the Lompoc Wind Energy Project.

Sincerely,

David Dolotta

Subject: Lompoc Wind Energy Project

Dear Members of the Board:

I strongly support the Lompoc Wind Energy Project. My husband is Danish and I have frequently visited Denmark. The many windmills dotting the landscape and seascape are most definitely NOT a visual eyesore and NOT a threat to birds. People with rifles and lead bullets are a much more significant threat to our local environment and wildlife than windmills would ever be.

The Danes are so far ahead of us when it comes to alternative sources of energy and green living. For years they have been heating homes with steam from factories, requiring tankless on-demand water heaters, and generating solar and wind power.

Please...I urge you to approve the Lompoc Wind Energy Project. It is time for forward thinking changes regarding our energy production.

Thank you,

Subject: Lompoc Wind Energy Project

I support this project.

Will you please support it as well.

The Lompoc Wind Energy Project, proposed for agricultural land five miles southwest of Lompoc, will capture wind energy with 65 wind turbines -- creating enough electricity to power about 40,000 local homes.

While there are some unavoidable biological and visual impacts of the project, CEC believes that the project's ability to provide 10% of our county's electricity demand is a major benefit to our region. The impacts are far less than building new natural gas, coal or nuclear plants -- and it will greatly enhance our county's energy grid reliability and our energy independence. Our region will also benefit from new jobs, cost-effective power and tax revenue.

Santa Barbara, CA, 93101

Dear Board of Supervisors:

I am writing to voice my full support for the Lompoc Wind Energy Project.

I believe that we need to take strong, immediate action to reduce our contribution to global warming. This is why I also support a full range of energy conservation and increased efficiency, renewable energy and sustainable transportation measures.

Please set a strong precedent for our region by advancing the Lompoc Wind Energy Project. As the first utility-scale renewable energy project in Santa Barbara County, it can send a strong message that we will do our part to preserve a livable future for our civilization. Moreover, the county will also benefit from new jobs, cost-effective power and tax revenue.

Sincerely,

2/6/2009

County Supervisors:

Please give the go-ahead to the Lompoc Wind Energy project. This is a very important project to demonstrate the feasibility of fossil-fuel independence. There are impacts to every type of energy and this one really has a low impact when you compare it with oil, gas or coal. Please take this VERY important step forward for Santa Barbara County. We have the ability to lead California and the nation on this issue; I hope you choose this leadership role.

Kind Regards,

Kathi King

Re: Lompoc Wind Energy Project

To Whom It May Concern:

I'm a supporter of moving our county away from fossil fuels and lessening the impacts of climate change. I also support energy conservation and increased efficiency, renewable energy and sustainable transportation measures.

The Lompoc Wind Energy Project is the first utility-scale renewable energy project in our county, so your handling of it will have major implications for future projects of this kind. While I have read about the likely biological and visual impacts of the project, I believe that the project's ability to provide 10 percent of our county's electricity demand is a worthwhile goal and will be a major benefit to our region. The impact from this wind power project is far less than new natural gas, coal or nuclear plants, and it will greatly enhance our county's energy grid reliability and independence. The County will also benefit from new jobs, cost-effective power and tax revenue.

I'd like to voice my full support for the Lompoc Wind Energy Project.

Sincerely,
Gary Mabry

Santa Barbara County Board Of Supervisors,

Developing clean, renewable energy is the key to a secure and prosperous future for our global human civilization. As demonstrated in CEC's "Fossil Free by '33" plan, our County has the opportunity to be a regional leader in realizing this imperative mission. The Lompoc Wind Energy Project is an important first step toward energy security and independence for our region. I urge you to support this essential project.

Feb 6, 2009

Dear Santa Barbara Board of Supervisors:

Replacing fossil fuels is a necessity for the welfare of our plant. This will benefit our county through jobs and providing 10 percent of our energy. We need these jobs as much as we need affordable renewable energy.

I am a resident and voter in Santa Barbara I am a great supporter the Lompoc Wind Energy Project!

It has to be done and now.
I like to see wind turbines dotting our landscape it is preferable to oil rigs!

Thank you for your time.
A green concerned citizen.

Subject: Lompoc Wind Energy Project

I wish to voice my support for the wind energy project proposed for the Lompoc area. Wind provides a clean, renewable, non-polluting source of electric power that will be close to the homes of those who will benefit from it, requiring little additional infrastructure to be built. It is the kind of energy, and the kind of project that is necessary to reverse our dependence on fossil fuels, domestic and imported. I urge you to approve this proposal. Sincerely, J. Wesley Brown PhD, 145 Vista de la Vumbre, Santa Barbara, CA 93105

Subject: Support Lompoc Wind Energy Project

I wholeheartedly support the Lompoc Wind Energy Project and urge you to vote to do the same. There are many sound environmental reasons to promote a project of this kind, as I am sure you are aware. There may also be a few obstacles to overcome, but in this era of diminishing oil reserves and the need to reduce environmental pollution and halt global warming, it is essential to develop non-polluting, sustainable and renewable sources of energy. Santa Barbara County should take pride in leading the way and setting an environmentally responsible example for other cities and counties.

Please vote for this project!

i have never before sent out a plea to my friends to take action on an issue. But i am sending you this because i know you care as much as i do about what is happening to our environment and you want to see change. Well here is a very easy way to help pave the way for Santa Barbara to begin to accept renewable energy projects. If this project does NOT pass it will be a major set back for our future in terms of renewable energy in this region. That would be a shame. So, we need as many people as possible to email the letter below to the address

sbcob@co.santa-barbara.ca.us

Please do this BEFORE the end of the day on Monday. The voting for this project takes place on Tuesday.

I promise i will not send you more things like this but this one is SOOO important i had to send it along. I hope you will take the time to cut and paste and email this letter.

thanks for you help, and if you want to discuss it i am available.
