

NOTICE OF EXEMPTION

TO: Santa Barbara County Clerk of the Board of Supervisors

FROM: Matt Naftaly, Water Agency

The project or activity identified below is determined to be exempt from further environmental review requirements of the California Environmental Quality Act (CEQA) of 1970, as defined in the State and County Guidelines for the implementation of CEQA.

APN: NA

Case No.: NA

Location: Santa Barbara County

Project Title: USGS Cooperative Stream and groundwater monitoring Program

Project Description: This Joint Funding program between the Water Agency and the USGS provides for a cooperative and cost sharing water resources data collecting program in Santa Barbara County. Streamflow, groundwater levels, and water quality throughout the County are monitored in accordance with this program which has been in effect for decades. The data collected is used for a myriad of purposes including facilities design, flood warning, climate studies, hydrologic modeling and reservoir operations studies among other purposes.

Exempt Status: (Check one)

- Ministerial
 Statutory Exemption
 Categorical Exemption
 Emergency Project
 Declared Emergency

Cite specific CEQA and/or CEQA Guideline Section: Categorical Exemption Section 15306 (Class 6) Basic data collection, research experimental management, and resource evaluation activities.

Reasons to support exemption findings: The USGS cooperative monitoring program provides information and data regarding ground and surface water throughout the County. Such data may be used to protect natural resources and the environment. The program results in no recommendations regarding future actions or policies and the County has not approved, adopted, or funded any future actions as a result of the program. The program does not result in a

serious or major disturbance to any environmental resource. Therefore, the above listed exemption applies to this action.

There is no substantial evidence that there are unusual circumstances (including future activities) resulting in (or which might reasonably result in) significant impacts which threaten the environment. The exceptions to the categorical exemptions pursuant to Section 15300.2 of the State CEQA Guidelines are:

- (a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located -- a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.**

The program utilizes gages previously installed or existing groundwater wells and stream flow monitoring stations. Therefore, the program results in no physical disturbance to the environment. The installation of groundwater monitoring wells by the USGS is categorically exempt from CEQA requirements as defined by Title 14, Chapter 3, Article 19, Section 15306 which addresses basic data collection, research, experimental management, and resource evaluation activities which do not result in serious or major disturbance to an environmental resource.

- (b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.**

There are no significant incremental or measurable cumulative impacts for the Cooperative Monitoring Program. Therefore, this exception to the Categorical Exemption is not applicable to the proposed project.

- (c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.**

The Cooperative Monitoring Program is for informational purposes only and will have no significant effect on the environment. All wells and gaging stations necessary for the study have been previously installed or pre-existing. Therefore, there is no reasonable possibility that the study will have a significant effect on the environment due to unusual circumstances.

- (d) **Scenic Highways.** A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to improvements which are required as mitigation by an adopted negative declaration or certified EIR.

The Cooperative Monitoring Program does not result in the installation of any facilities that are viewable from any scenic highway area. Therefore, this exception to the Categorical Exemption is not applicable.

- (e) **Hazardous Waste Sites.** A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

The Cooperative Monitoring Program is not located on a Hazardous Waste site. Therefore, this exception to the Categorical Exemption is not applicable to the proposed project.

- (f) **Historical Resources.** A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.

Conduct of the Cooperative Monitoring Program has no impact on any historical resources.
