Re: Public Comment – February 6, 2018 Meeting  
Additional comments on the Cannabis Land Use Ordinance and Licensing Program and Final Program Environmental Impact Report

Dear Chair Williams and Members of the Board:

The City of Carpinteria (“City”) submits this letter regarding the proposed findings and statement of overriding considerations under the California Environmental Quality Act (“CEQA”) for Santa Barbara County’s (“County”) proposed Cannabis Land Use Ordinance and Licensing Program (“Cannabis Regulations”).<sup>1</sup> This letter also discusses additional flaws in the environmental review of the Cannabis Regulations. This letter supplements the City’s previous letters commenting on the Cannabis Regulations and associated Program Environmental Impact Report (“PEIR”) and incorporates those comments by reference.<sup>2</sup> The City acknowledges that, as of the release of amended materials on February 1, 2018, staff is now proposing that your Board find the proposed Coastal Zoning Ordinance (“CZO”) amendments that are part of the Cannabis Regulations exempt from CEQA, under the assertion that these are instead subject to the Coastal Commission’s certified regulatory program pursuant to CEQA Guidelines 15265. Given this change, the City would like to clarify that its comments on the PEIR contained herein and in all previous comment letters pertain to all of the proposed Cannabis Regulations, including all proposed inland and coastal zoning regulations and all other components of the project description.

In a supplement to its January 29<sup>th</sup> comment letter, submitted on February 2<sup>nd</sup>, the City requested specific amendments to the proposed Cannabis Regulations to implement the mitigation recommended in the January 29<sup>th</sup> letter. These textual changes together with the establishment of a mechanism for sharing funds with the City adequate to mitigate impacts to housing and police services (the City realizes that this mechanism cannot be established at the February 6<sup>th</sup> hearing) would satisfactorily mitigate impacts within the Carpinteria Valley and City. If the Board is not willing, at its February 6<sup>th</sup>

---

<sup>1</sup> The adoption of the Cannabis Regulations is sometimes referred to herein as the “Project.”

<sup>2</sup> All of the City’s previous comment letters are included in the Board’s agenda materials for the February 6<sup>th</sup> hearing.

hearing, to adopt the amendments proposed by the City, the City again requests that the Board continue consideration of this item to a later hearing. Adoption of the Cannabis Regulations and PEIR in their current form would violate CEQA due to: (1) the flaws in the environmental review discussed herein and in the City's previous comment letters, and (2) the inability to make the necessary findings and statement of overriding considerations to certify the PEIR and approve the Cannabis Regulations.

**I. THE FINDINGS FOR APPROVAL IMPROPERLY REJECT FEASIBLE MITIGATION MEASURES AND PROJECT ALTERNATIVES THAT WOULD REDUCE IMPACTS WITHOUT AN ADEQUATE BASIS**

CEQA requires that the findings rejecting proposed alternatives and mitigation measures be supported by findings stating the specific reasons for rejecting the alternatives or measures.<sup>3</sup> When an agency rejects alternatives or mitigation measures for a significant impact, CEQA requires that the agency make specific findings that the rejected alternatives or measures are infeasible due to specific economic, legal, social, technological, or other considerations.<sup>4</sup> A statement of overriding considerations may be set aside if the agency has failed to consider feasible mitigation or improperly determined mitigation to be infeasible.<sup>5</sup>

In previous comment letters the City identified a variety of potential feasible mitigation measures, most of which were included in the Final PEIR as part of the City's comments. All of the City's suggested mitigation measures have been rejected. In most cases, no reason for rejecting them was provided in the Final PEIR and no reason is provided in the agenda materials for the Board hearing on February 6<sup>th</sup>. Instead of providing a rationale for rejecting the measures proposed by the City, the findings with respect to Class I impacts simply discuss the mitigation measures included in the PEIR and then state that "[n]o other feasible mitigation measures are known that will further reduce these impacts."<sup>6</sup> This is incorrect because the City has proposed a number of specific feasible mitigation measures that were rejected without any apparent consideration or basis.

In its alternatives analysis, the PEIR concludes that Alternatives 1, 2, and 3 would not achieve the first project objective to "[d]evelop a robust and economically viable legal cannabis industry to ensure production and availability of high quality cannabis products to help meet local demands, and as a public benefit, improve the County's tax base." However, the PEIR provides no factual evidence to support this conclusion. The basis for determining what is or is not a "robust and economically viable" cannabis industry,

---

<sup>3</sup> 14 CCR § 15091(c).

<sup>4</sup> Public Resources Code § 21081(a)(3); 14 CCR § 15091(a)(3).)

<sup>5</sup> See *City of San Diego v Board of Trustees of Cal. State Univ.* (2015) 61 C4th 945, 955 (statement of overriding considerations and infeasibility finding vacated when both depended on erroneous assumption that agency may contribute funds for off-site mitigation only through earmarked appropriations). (Kostka & Zischke, Practice Under the California Environmental Quality Act, 17.34, citing 14 CCR § 15043(b).)

<sup>6</sup> Board letter, February 6, 2018, Amended Attachment 1 (Findings for Approval and Statement of Overriding Considerations), Section 1.2.5.

as stated in the objective, is that it helps meet local demand and improves the County's tax base. First, the PEIR does not provide information on the extent of local demand such that it is feasible to determine whether or not that demand could be met under any of the alternatives. Second, assuming voters approve a local tax on cannabis activities, the County's tax base will be improved with even a small number of cannabis activities licensed. This would be feasible under all of the alternatives except the "no project" alternative. The PEIR lacks substantial evidence to support the conclusion that Alternatives 1, 2, and 3 would not result in a robust and economically viable legal cannabis industry. Given that this conclusion is a primary reason for rejecting the alternatives, the PEIR inappropriately dismissed these alternatives.

"[A]n adequate EIR must respond to specific suggestions for mitigating a significant environmental impact unless the suggested mitigation is facially infeasible."<sup>7</sup> The response should "evince good faith and a reasoned analysis."<sup>8</sup> The findings for approval and the PEIR are inadequate because they fail to consider and provide specific reasons for rejecting feasible mitigation measures proposed by the City and do not substantiate the reasons for rejecting the alternatives presented in the PEIR.<sup>9</sup>

**II. THE STATEMENT OF OVERRIDING CONSIDERATIONS VIOLATES CEQA BECAUSE IT DOES NOT PROVIDE SUBSTANTIAL EVIDENCE THAT THERE IS NO FEASIBLE WAY TO AVOID OR LESSEN SIGNIFICANT IMPACTS OF THE REGULATIONS OR THAT THE SPECIFIC BENEFITS OF THE REGULATIONS OUTWEIGH THE NUMEROUS UNAVOIDABLE SIGNIFICANT IMPACTS**

When an agency seeks to approve a project despite the significant impacts the project would have on the environment, CEQA requires the agency to adopt a statement of overriding considerations.<sup>10</sup> A statement of overriding considerations must include specific findings, supported by substantial evidence, that: (1) there is no feasible way to lessen or avoid the significant effect on the environment; and (2) specific expected benefits from the project "outweigh the unavoidable adverse environmental effects."<sup>11</sup> Further, an agency must make a "fully informed and publicly disclosed" decision that "[s]pecifically identified expected benefits from the project outweigh the policy of reducing or avoiding significant environmental impacts of the project."<sup>12</sup> A statement of overriding considerations must be supported by substantial evidence in the record of the agency's proceedings.<sup>13</sup>

---

<sup>10</sup> Public Resources Code § 21081.

<sup>11</sup> 14 CCR §§ 15043, 15093(b).

<sup>12</sup> *Kostka & Zischke, Practice Under the California Environmental Quality Act*, 17.33, citing 14 CCR § 15043(b).

<sup>13</sup> 14 CCR § 15093(b).

As explained in this letter, in the City's previous comment letters, and in letters by other commenters, the PEIR has not adopted every feasible measure to avoid or lessen the project's significant effects. The proposed statement of overriding considerations does not comply with CEQA because it does not provide an adequate basis for overriding the thirteen Class I impacts identified in the PEIR.

The statement of overriding considerations is also unsupported by substantial evidence and fails to show a rational connection between the evidence presented in the PEIR and the conclusions reached in the statement of overriding considerations and findings. The statement of overriding considerations claims that any one of nine statements "would have been sufficient to outweigh adverse impacts." Yet the EIR lacks substantial evidence that the expected benefits from approval of the Cannabis Regulations would outweigh the unavoidable adverse environmental effects.

Several reasons identified in the statement of overriding considerations for overriding the Project's significant adverse environmental effects focus on narrow aspects of the Project. These aspects of the Project could be achieved with mitigation to reduce significant environmental impacts and/or by adopting one of the alternatives evaluated in the PEIR.

Specifically, Statement C states that "[t]he [P]roject . . . expands the production and availability of medical cannabis, which is known to help patients . . . ." The PEIR provides no evidence to support that only the Cannabis Regulations as proposed could achieve this benefit. None of the mitigation measures proposed by the City would prevent the cultivation and production of cannabis products within the County or restrict the availability of cannabis for medicinal use.

Similarly, Statement H states that "[t]he [P]roject . . . provides opportunities for local testing labs that protect the public by ensuring that local cannabis supplies meet product safety standards established by the State of California." There is no evidence to support the necessity of local testing labs to ensure product safety. In fact, as Statement H states, product safety standards are established and enforced by the State of California and would be required regardless of whether local testing labs exist. Furthermore, there is no evidence that testing labs could not be allowed and compliance achieved with implementation of mitigation to further reduce or avoid significant environmental effects. None of the City's proposed mitigation measures limit or restrict testing labs. Therefore, this is not a unique benefit of the Project and not a reason to override its many significant environmental impacts.

Statement A states that "[t]he [P]roject . . . provides a robust and economically viable legal cannabis industry to ensure production and availability of high quality cannabis products to help meet local demands, and, as a public benefit, improves the County's tax base." However, as stated above in section I of this letter, the PEIR and proposed findings for approval do not substantiate the conclusion that Alternatives 1, 2 and 3 do

not achieve this project objective. Therefore, this statement is also not supported by substantial evidence that there is no way to feasibly avoid or lessen significant effects on the environment.

Several reasons stated in the statement of overriding considerations refer to land use requirements of the Project that will minimize environmental impacts, protect natural resources, and strengthen and increase code enforcement actions against illegal or noncompliant cannabis uses. These are not Project benefits, they are requirements of CEQA, County policy, and good planning and law enforcement practice. Further, contrary to these assertions, the PEIR analysis demonstrates the Project will actually cause new significant environmental impacts or increased impacts in these exact areas, which the statement of overriding considerations claims the Project is protecting. The County is improperly characterizing its efforts to reduce impacts caused by the Project, as required by CEQA, as benefits of the Project.

Statement D states that “[t]he [P]roject . . . allows for orderly development and oversight of commercial cannabis activities by applying development standards that require appropriate siting, setbacks, security, and nuisance avoidance measures, thereby protecting public health, safety, and welfare.” Similarly, Statement F states that “[t]he [P]roject . . . establishes land use requirements for commercial cannabis activities to minimize the risks associated with criminal activity, degradation of neighborhood character, groundwater basin overdraft, obnoxious odors, noise nuisances, hazardous materials, and fire hazards.” Yet the PEIR identifies traffic safety, long-term noise increases, exposing substantial people to obnoxious odors, and noncompliance with adopted air quality and greenhouse gas emission regulations as Class I impacts. (PEIR, Table ES-1.) In fact, the Project will create public health, safety, and welfare impacts and substantial public nuisances, and the statement of overriding considerations attempts to override rather than mitigate these effects.

Additionally, Statement I provides that “[t]he [P]roject . . . protects agricultural resources, natural resources, cultural resources, and scenic resources by limiting where cannabis activities can be permitted . . . .” However, the PEIR identifies Class I impacts for agricultural and scenic resources. As proposed, the effects of the Cannabis Regulations would directly contravene the basis for overriding.

Statement E states that “[t]he [P]roject provides a method for commercial cannabis businesses to operate legally and secure a permit and license to operate in full compliance with County and state regulations, maximizing the proportion of licensed activities and minimizing unlicensed activities.” Statement E further claims “the County will use revenue from the project...to strengthen and increase code enforcement actions in an effort to remove illegal and noncompliant operations occurring in the County unincorporated areas.” However, no mitigation measures or any component of the project description require the establishment of said enforcement program or the provision of a funding mechanism, generated by the Project, in order to drive enforcement efforts. The furthest the PEIR goes in addressing this is to state that

“[e]ffective enforcement requires adequate administration and funding, which may be partially afforded by revenues from the cannabis industry in the County.”<sup>14</sup> Thus, there is no assurance this benefit will be achieved. Further, remedying a failure to adequately enforce against preexisting noncompliance and illegal activity does not constitute a project benefit, particularly when the Project has the potential to result in increased illegal activities. As cited in a previous City comment letter, there has been recent criminal activity in the Carpinteria Valley associated with existing cannabis operations.

Finally, Statement B is unsupported by substantial evidence and is contradictory to evidence provided in the PEIR. Statement B claims that “[t]he [P]roject . . . enhances the local economy and provides opportunities for future jobs, business development, and increased living wages.” This is directly contradicted by the PEIR which states, “it is likely that many cannabis employees would live at or below the ‘low income’ threshold [criteria established by the California Department of Housing and Community Development] and may qualify for affordable and/or farmworker housing options.”<sup>15</sup>

Accordingly, the statement of overriding considerations is unsupported by substantial evidence. Therefore, the statement of overriding considerations fails to provide evidence of economic, legal, social, technological, or other benefits that override the unavoidable environmental impacts of the Cannabis Regulations.

### **III. THE PEIR GROSSLY UNDERESTIMATES THE CANNABIS USE IN THE CARPINTERIA VALLEY, WHICH WILL RESULT IN ACUTE IMPACTS THAT WARRANT SUB-REGIONAL ANALYSIS**

The City has advocated in previous comment letters for the PEIR to include a sub-regional analysis of impacts caused by cannabis industry development in the Carpinteria Valley. In its January 29<sup>th</sup> letter, the City proposed a specific methodology for conducting this analysis based on two scenarios: (1) 20% of expected cannabis growth Countywide being located in the Carpinteria Valley, and (2) full build-out within the Carpinteria Valley. Under both scenarios, the City’s expert consultant concluded there would be significant impacts to the City in a number of issue areas. The County also estimated in its PEIR that approximately 20% of existing cannabis cultivation within the County occurs in the Carpinteria Valley.<sup>16</sup> County records on the number of temporary licenses issued to date to existing cultivators demonstrate that the 20% scenario and estimate is likely an understatement of potential cannabis canopy within the Carpinteria Valley.<sup>17</sup>

---

<sup>14</sup> PEIR, pp. 8-12 to 8-13.

<sup>15</sup> PEIR, p. 3.14-13.

<sup>16</sup> PEIR, pp. 2-23 and 8-87.

<sup>17</sup> Cannabis license data received from Santa Barbara County, email communication from Dennis Bozanich, January 30, 2018. Spreadsheets obtained from the County providing data on licenses issued are attached hereto.

According to the data obtained from the County, of the 694 temporary cannabis cultivation licenses issued by and pending review with the State for operations in Santa Barbara County, 244 (35%) are located in the Carpinteria Valley.

This new information emphasizes the necessity of a Carpinteria Valley specific analysis that discloses and effectively mitigates the sub-regional impacts of a concentration of cannabis uses in the Valley.

It is also likely that the PEIR may underestimate the potential impacts of the cannabis industry as a whole within the County. Publicly available data demonstrates that Santa Barbara County is second only to Humboldt County in number of temporary licenses issued by County.<sup>18</sup> This new information indicates that the potential size of the industry in Santa Barbara County and, therefore, the potential impacts, may have been underestimated in the PEIR.

The PEIR should be revised to account for these significant new circumstances revealed by County records and public information, and new mitigation should be proposed to address the increased impacts that can be expected in the Carpinteria Valley.

#### **IV. PROPOSED MODIFICATIONS TO ODOR CONTROL REQUIREMENTS ARE FEASIBLE AND SUPPORTED BY GROWERS IN THE CARPINTERIA VALLEY**

At the City Council's January 29<sup>th</sup> hearing regarding its comments on the PEIR, several growers in the Carpinteria Valley testified that they are currently employing a top of the line vapor-phase system that is resulting in highly effective odor control. The growers testified that the technology can feasibly be employed by growers and is not cost prohibitive. The growers stated that they are forming a coalition and will recommend that all members utilize the vapor-phase system.<sup>19</sup>

The growers' testimony supports the City's recommended modifications to the odor control requirements, as stated in the City's February 2<sup>nd</sup> letter, and demonstrates that a requirement to use a vapor-phase system is feasible.

#### **V. IT IS IMPROPER TO FIND THE AMENDMENTS TO THE COASTAL ZONING ORDINANCE EXEMPT FROM CEQA REVIEW AT THIS TIME**

Staff is recommending that the Board find that the amendments to the County's Coastal Zoning Ordinance are exempt from CEQA review pursuant to Public Resources Code

---

<sup>18</sup> The most recent data available from the California Department of Food & Agriculture, CalCannabis Cultivation Licensing shows 242 licenses issued in Humboldt County and 171 in Santa Barbara. Info available at <https://aca6.accela.com/CALCANNABIS/Cap/CapHome.aspx?module=Licenses>. See attached table.

<sup>19</sup> A video of the hearing can be viewed at the City's website at: <http://www.carpinteria.ca.us>.

section 21080.9 and CEQA Guideline 15265, which provide that CEQA does not apply to activities necessary for adoption of a local coastal program and that the review shall be performed by the Coastal Commission. At no time throughout the process of preparing the PEIR did the County give any indication that the environmental review of the Coastal Zoning Ordinance amendments would be deferred to the Coastal Commission. In fact, the PEIR analyzes impacts in the Coastal Zone.

The Cannabis Regulations affect more than just the Coastal Zone and local coastal program – they affect the entire County. The City is aware of no case law supporting the use of this exemption when a project affects more than just the Coastal Zone or the agency's local coastal program. Use of the exemption in such a circumstance runs counter to CEQA principles requiring that the lead agency analyze the whole of the project with the potential to affect the environment.<sup>20</sup> “[T]he lead agency must describe the project to encompass the entirety of the activity that is proposed for approval. This ensures that all potential impacts of the proposed project will be examined before it is approved.”<sup>21</sup> A lead agency cannot review the environmental impacts of a project in piecemeal fashion.<sup>22</sup> When actions have both discretionary and ministerial (exempt) components, the lead agency should err on the side of finding that the entire project is discretionary and subject to CEQA.<sup>23</sup>

While the PEIR does consider the Project as a whole, the analysis is inadequate for the reasons stated in the City's comment letters. The County may not now certify a PEIR that contains an inadequate analysis of impacts in the Coastal Zone by separating out that portion of the Project and claiming it is exempt from CEQA review at this time. Even if a portion of the Project could be exempted from CEQA, that does not absolve the County of the obligation to analyze the Project in its entirety or the requirement that entire analysis meet the standards of CEQA.

Dividing the Cannabis Regulations into two pieces with separate environmental reviews runs afoul of the CEQA requirement to analyze the whole of the project and would result in an inadequate analysis of the effects of the whole project.

## **VI. INTERIM LICENSING IN THE COASTAL ZONE WOULD VIOLATE THE LAW BECAUSE THE IMPACTS HAVE NOT BEEN REVIEWED UNDER CEQA**

Finally, the City understands that the Board may at some point consider whether to issue authorizations allowing applicants to apply for State licenses to operate new or expanded commercial cannabis uses in the Coastal Zone prior to the Cannabis Regulations taking effect. The City strongly opposes this concept. Without regulations

---

<sup>20</sup> 14 CCR § 15378(a).

<sup>21</sup> Kostka & Zischke, Practice Under the California Environmental Quality Act, 6.31.

<sup>22</sup> See *City of Carmel-by-the-Sea v Board of Supervisors* (1986) 183 Cal.App.3d 229, 251 (county violated CEQA by preparing negative declaration for rezoning and reserving preparation of EIR until later stage of approval).

<sup>23</sup> See, e.g., *Day v. City of Glendale* (1975) 51 Cal.App.3d 817, 823.

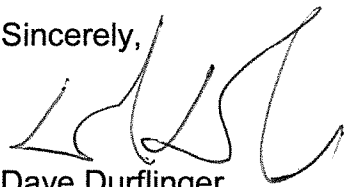

in place, there would be no vehicle to ensure that new uses comply with the County's regulations, which are necessary to protect the public health and safety, and mitigate impacts to the environment. No analysis of potential impacts associated with such interim authorizations is included in the PEIR. Furthermore, the PEIR relies on the regulations to mitigate a variety of anticipated impacts from new cannabis uses. Therefore, an interim authorization scheme would require further environmental review under CEQA, which would likely result in a number of Class I impacts. The City provided more detailed comments on this issue in its December 12<sup>th</sup> comment letter, which is included in the Board's materials.

The City urges the Board not to issue any form of authorization allowing new or expanded cannabis uses within the Coastal Zone (uses that do not qualify as existing and legal non-conforming under Article X of the County's Zoning Ordinance) until the Cannabis Regulations become operative.

## **VII. CONCLUSION**

For the reasons stated above, the PEIR analysis, findings for approval, and statement of overriding considerations fail to comply with CEQA's requirements. If the County incorporates the City's proposed amendments to the proposed Cannabis Regulations and establishes a mechanism to provide adequate funds to the City for mitigation of housing and police services impacts, it would effectively mitigate impacts of the Project within the Carpinteria Valley and City. If the Board is unwilling to adopt the City's recommended amendments at the February 6<sup>th</sup> hearing, the City requests that the item be continued to allow more time for the County to consider additional feasible mitigation and revise the PEIR. Thank you for considering these comments. The City also opposes the issuance of any authorization for a new or expanded cannabis use in the Coastal Zone prior to the Cannabis Regulations taking effect.

Sincerely,

Dave Durlinger  
City Manager, City of Carpinteria
