*Typical road to be resurfaced on Ben Lomond Dr.*

**Background:**

This project will resurface approximately 28.9 lane miles of County maintained roads. Locations are included as Attachment A. Construction is scheduled to begin in April and to be completed June 2015. Traffic control will be provided and delays are anticipated to be less than 10 minutes. The Department will notify emergency response services and will use construction area signs to notify the traveling public.

Your Board approved the filing of the CEQA Exemption on April 16, 2013, as part of the Road Maintenance Annual Plan (RdMAP) approval, in conformance with CEQA Guidelines Section 15301(c).

This scrub seal and micro-surfacing project is one strategy the Department employs in its Pavement Preservation Program. The first step is to repair failed areas focused on structural rehabilitation. Then a

scrub seal is applied, consisting of polymer modified asphaltic rejuvenating emulsion scrubbed by a broom into cracks and voids. Next, aggregate is spread on the emulsion and rolled by pneumatic tire compactors. One to five days later, micro-surfacing is placed on top of the scrub seal. Micro-surfacing is a mixture of polymer modified asphalt emulsion, mineral aggregate and filler.
