Dear County of Santa Barbara,

I support taking climate action and making new buildings sustainable and carbon-free!

New all-electric buildings will improve people's health by reducing toxic air pollution; combat climate change by reducing greenhouse gas emissions; and improve housing affordability by saving construction costs and lowering utility bills.

A study for the LA Dept of Water and Power finds that "all-electric new construction results in savings of \$130-\$540 per year relative to a gas-fueled home over the life of the equipment."

All-electric buildings are less expensive to build and less expensive and healthier to live in.

Thank you for maintaining Santa Barbara County's environmental leadership.

Sincerely,

Dawna Knapp

Dear County of Santa Barbara,

To: Santa Barbara County

The fact that Santa Barbara County is considering passing an all electric health and safety ordinance just like the City of Santa Barbara passed last year with our help is forward thinking and wonderful for the planet. I am very hopeful that the Santa Barbara Board of County Supervisors will consider an all electric new building for unincorporated Santa Barbara County and possible other buildings is very good. Thank you in advance for your consideration on this matter of importance to contributing to greater steps in reducing climate change worldwide.

I support taking climate action and making new buildings sustainable and carbon-free!

New all-electric buildings will improve people's health by reducing toxic air pollution; combat climate change by reducing greenhouse gas emissions; and improve housing affordability by saving construction costs and lowering utility bills.
