Subject: Local Coastal Plan

Honorable Board of Supervisors,

Please retain local control. A local coastal plan similar to that at the City of Santa Barbara at least retains local government control of private property rights, and does not cede local control to technocrats at the State of CA, who attempt to take over our coast.

Witness the revetment fiasco at Goleta Beach. The state of CA can build and maintain revetments to protect state highways, yet they refuse to allow the County to preserve our own parks. Please resist this invasion of local control by the already almost bankrupt State of California. Leon Lunt 517 Carriage Hill Court, Santa Barbara County.
(retired County of S B employee)
