Subject: Public comment, Departmental agenda item 5, BOS meeting of 8/31/21

**Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.**

- 1- At the time this email is being prepared, 10:30 A.M 8/27/21, there has been no staff report or other documents made available to the public for this item.
- 2- County PHD has still refused to provide requested statistical information to the public concerning COVID infection rates and other medical/scientific information.
- 3- The Pfizer vaccine approval was not subject to any scientifically acceptable clinical trial for its efficacy against the COVID-19 Delta variant.
- 4- The Pfizer vaccine is proving to be ineffective in preventing the spread of the Delta variant in workplace, school and other environments.
- 5- Any county employee who is compelled by a vote of the BOS to become vaccinated may seek legal action if the vote of the BOS is based on information known by the BOS to be false.

Bobbi McGinnis

Santa Barbara Ca. 93110

Aug. 27, 2021

Dear Board of Supervisors,

My name is Bobbi McGinnis and I am calling Greg Hart and all County Board of Supervisors to let them know they should oppose any County employee mandates regarding the vaccines.

- This action is an overreach of government and is an invasion of a person's privacy. It promotes hate, bigotry, and segregation against those who are medically disabled, immune compromised, or who have legitimate concerns over their health and the vaccine.

Furthermore, if you have ebola, hepatitis, shingles, MRSA, meningitis, conjunctivitis, diphtheria, pertussis, tuberculosis, chicken pox or cold/flu/cough you may still travel, go to work, go to school, go to a restaurant, go to a gym, go to a mall, go to the grocery store, go to the theater and go to concerts.

- California led the way in protecting the rights of those with HIV, an active communicable disease. Your actions today can defend the Constitution and individual rights of privacy or you can stomp on them. To quote former supervisor Peter Adams, " This Board does not take away American citizens bill of rights."

- This action promotes hate, bigotry, and segregation against those who are medically disabled, immune compromised, or who have legitimate concerns over their health and the vaccine. Do the right thing, the American way. Vote against mandated vaccines.

Bobbi McGinnis
