**Summary Text:**

This item is on the agenda to approve the attached Statement of Final Quantities. The bridge was widened seven feet on the north side of the existing structure providing two-12-foot wide travel lanes, two-foot wide shoulders, and the existing structural elements were strengthened to meet the current Caltrans design standards. The roadway was widened to match the new bridge and an improved road profile was constructed for a smoother approach and departure from the bridge.

On May 3, 2016, your Board awarded the above referenced construction contract to R. Burke Corporation, and construction began on May 31, 2016. The Director of Public Works accepted this project as complete on February 24, 2017. The project was completed on time, with a contract extension to provide a surface treatment to State Route 1 to cover temporary striping needed for project traffic controls.
