RE: Community Workforce Agreement

I'm writing in support of the CWA that will be coming before you.

Community Workforce Agreements will not affect all construction projects in the County of Santa Barbara, only county owned projects and only those that are over the threshold you set. The bigger projects attract the bigger contractors, and they usually come from out of the area with their workforce. The community workforce agreement will create opportunity for our workforce, giving them an opportunity for apprenticeship and a career with family health care and pensions. A "YES" vote will give you the opportunity to have your say in what this agreement will look like. I encourage you to let County Staff and The Building Trades move forward and negotiate the best CWA for the County of Santa Barbara.

Thank you for your consideration,

Bill Baker

Chairman Bob Nelson, Santa Barbara County Board of Supervisors

August 16, 2021

RE: Community Workforce Agreement

I am writing to you in **support** of the Community Workforce Agreement that will be under consideration at the Board of Supervisors meeting tomorrow.

Community Workforce Agreements establish minimum labor standards for working conditions, jobsite safety, dispute resolution, worker qualifications and local hire referral. Project Labor Agreements set community goals to improve pathways to joint apprenticeship training and journeyman continuing education programs while gaining employment opportunities for women, minorities and returning veterans. All Non-Union employers and qualified workers can participate in Project Labor Agreements.

I strongly encourage you to vote yes to enter negotiations with the Tri Counties Building Trades on a Community Workforce Agreement that will benefit Santa Barbara's community and Local workforce.

Thanks for your time and consideration.

Chuck Huddleston
