

2025/26 (25STM3) Storm Emergency Response Report

February 24, 2026

Flood Control Work:

The following work to remove material and debris from flood control systems must be completed on an emergency basis to create capacity within the debris basins and creeks in preparation for additional rain and storm events this winter. Use of competitive procurement proposals or formal bids or awarding would delay the immediate action required to address public safety, access, and welfare.

Various debris basin cleanouts:

General Project Work Description: Material and debris removal.

Project location descriptions:

San Pedro Silt Basin

Contract: PO with T&T Truck and Crane Service, contract number: SCON-003369, estimated cost \$200,000

Contract Completion date: February 24, 2026
